

EZP1 Rockline® Standard-Duty Precleaner

Simple, Quick, Effective

The EZP1 Precleaner is not your average solid-blade belt cleaner that mounts on the head pulley. It features a unique uni-blade design that combines simple, do-it-yourself installation, quick maintenance, and effective cleaning results with a price tag that you can afford.

Features and Benefits

- **Works with Flexco mechanical splices.** The spring tensioner allows the blade to quickly move away from the belt when a splice passes. The polyurethane blade material easily glides over the splice without damage and with minimal cleaning disruption.
- **Compact, streamlined design.** The EZP1 Precleaner requires only 100 mm of horizontal clearance for correct installation. Its streamlined contours prevent material buildup on the blade or the pole.
- **Can be used on reversing belts.** Installing cleaners on both pulleys gives superior cleaning results on belts that run in both directions.
- **Fits most conveyor structures.** Available for belt widths from 300 mm to 1800 mm.
- **Blade can be used on other cleaners.** The ConShear™ blade can be used as a replacement blade on many OEM cleaners.

Self-contained spring tensioner allows for measurable and verifiable tension

Rockline® Standard-Duty Precleaner

Specifications and Guidelines

Maximum Belt Speed

3.5 M/sec

Temperature Rating

-35°C to 82°C

Minimum Pulley Diameter

250 mm

Blade Height

185 mm

CEMA Cleaner Rating

Class 3

Usable Blade

Wear Length

100 mm

Blade Material

Polyurethane 83 durometer
(proprietary blend for
abrasion resistance and
long wear)

Available for Belt Widths

400 mm to 1600 mm

Horizontal Clearance Required

100 mm

Vertical Clearance Required

238 mm
