Heavy-Duty Precleaner

Maximum Cleaning for the Harshest Applications

The MHP Heavy-Duty Precleaner battles the worst environments with the most abrasion-resistant polyurethane blade Flexco offers. Features multiple material path options and extended pole lengths to ensure it fits the application perfectly. The enormous blade provides an extended life so this heavy-duty cleaner can get the job done.

Features and Benefits

- **Versatile.** Pole length is belt width plus 54" (1350mm) to fit varying conveyor or chute wall widths. Pole extenders are available for extended length requirements.
- **Works with Flexco and other mechanical splices.** The spring tensioner quickly moves the blade away from the belt when a splice passes. The polyurethane blade easily glides over the splice without damage and with minimal cleaning disruption.
- **Made for mining conveyors.** Made from heavy-duty steel with corrosion-resistant powder coating, the MHP is available for belt widths from 24" to 96" (600 to 2400mm). Special sizes are available upon request.
- **Complete cleaning system.** When teamed with our MHS Secondary Cleaner, it makes up a system that delivers maximum cleaning power. If extra water is present, the MDWS DryWipe can be added.
