

HIGH TEMP EZS2 Secondary Cleaner

The Economical, Efficient Belt Cleaning Solution

The High Temp EZS2 Secondary Belt Cleaner improves belt cleaning efficiency and reduces routine maintenance tasks in environments up to 204° C (400° F) or spikes up to 232° C (450° F). And it does all of this at an affordable price. Add easy, do-it-yourself installation and it makes an unbeatable solution for your conveyor belt cleaning needs.

Features and Benefits

- **Cleaning efficiency of metal blades.** The thin, hard edges of the metal blades deliver high cleaning efficiency and long wear life.
- **Works with Flexco mechanical splices.** The tungsten carbide-tipped blades are impact-resistant, and the spring cushion allows them to move away from a passing splice without damage and with minimal cleaning disruption.
- **A complete cleaning system.** When the High Temp EZS2 is teamed with the High Temp EZP1, the system proves maximum cleaning power for tough high temperature applications.
- **Fits most conveyor structures.** Available for belt widths from 450mm to 1800mm (18" to 72").

HIGH TEMP EZS2

Secondary Cleaner

Specifications and Guidelines

- **Maximum Belt Speed**
3.5M/sec (700 FPM)
- **Max Temperature Rating**
-35° C to 204° C F (-30° F to 400°)

- **Pole Length**
Blade width + 850mm (34")
- **Maximum Conveyor Span**
Blade width + 725mm (29")

- **Blade Material**
Impact Resistant Tungsten Carbide (works with mechanical fasteners)
- **Usable Blade Wear Length**
9mm (3/8")

- **Available for Belt Widths**
450 to 1800mm (18" to 72")
- **Horizontal Clearance Required**
100mm (4")
- **Vertical Clearance Required**
213 to 238mm (8-1/2 to 9-1/2")
