H-TYPE® High-Temp Precleaner with V-Tips

Vulcanized Belt, High Temp Precleaner

The Flexco H-Type® Precleaner with High Temperature V-Tips is designed to be positioned on the head pulley and to remove the bulk of the carryback from the belt. It has the ability to withstand ambient temperatures up to 400° F (204° C) and spikes up to 450° F (232° C). Proven performance over 20 years as the most efficient primary cleaner in material handling applications such as coal, iron ore, bauxite and hard rock mining.

Features and Benefits

- Works with vulcanized belts. The tungsten carbide tips allow for maximum cleaning efficiency and superior wear characteristics. Comes with protected tips for abrasive applications.
- **Complete cleaning system.** When teamed with a secondary cleaner, it makes up a system that delivers maximum cleaning power for the most abusive conveyor applications.
- Made for mining conveyors. Made from heavy-duty steel with corrosion-resistant powder coating, the H-Type is available in sizes for belt widths from 18" to 48" (450 to 1200mm). Additional sizes are available upon request.
- **Optimal positioning.** Blade contact on the pulley is 15° below the horizontal centerline. This keeps the blades out of the discharge path and protects them from rocks, large lumps and other debris.

H-TYPE® High-Temp Precleaner with V-Tips

Specifications and Guidelines

Maximum Belt Speed

1000 FPM (5 M/sec)

Temperature Rating

-30° F to 400° F (-35° C to 204° C) spikes up to 450° F (232° C)

Minimum Pulley Diameter

8" (200 mm)

Usable Blade Wear Length

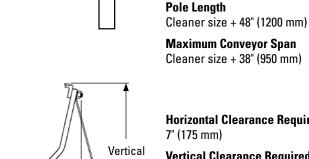

3/8" (9 mm)

Blade Material

Tungsten carbide (for vulcanized belts only)

Available for Belt Widths

18" to 48" (450 to 1200 mm)

Horizontal Clearance Required

Vertical Clearance Required

Overall Pole Length

Maximum Conveyor Span

SS: 13" (325 mm) S: 15" (375 mm) M: 16-1/2" (413 mm)
