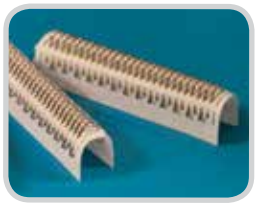
CLIPPER®
Laundry Patch Fastener System

Apply Fasteners and Patch in One Installation Process

Gone are the days where binding laundry tapes and installing wire hooks were two different processes. With the Clipper® Laundry Patch Fastener System binding of the cotton laundry tapes and fastener installation is a single installation process. Clipper Wire Hooks are supplied preloaded into a patch material. The lacer applies pressure to the heated jaws to properly clinch the fasteners while simultaneously heating and activating the glue on the inside of the patch. The glue becomes liquid and permeates the laundry tape, and when cooled, binds the laundry tape fibers to prevent the fasteners from pulling through the belt end.



Individual fasteners *are secured in the patch material*

Fastener points *are covered by the patch during installation*

Custom patch logos *available*

Heated jaws *activate the glue during the quick installation process*

Built-in cooling station *insures proper bonding of the patch material with the laundry tape*

Customer Value:

- One step process means no messy binder process and no fumes to inhale
- Fast installation and long-lasting splices ensure no lost production time
- Patch covering prevent hooks from catching and damaging linens
- From hours to seconds – the entire Clipper® patch process takes only 20 seconds

Laundry Patch Fastener and Pin Size Selection Chart

Minimum Pulley Diameter	Wire Diameter		Connecting Pin Size		Belt Thickness
	mm	in.	mm	in.	2.0 mm (.078")
25 mm (15/16")	0.62	.024	1.40	.055	25SP

Installation Tools

The electric hydraulic PRO-150 offers the quickest and easiest methodology for installing the patch fasteners. Lacer includes both a heating/pressing station and a cooling station.

The PRO-120 offers a manual, yet quick, method for installing the patch fasteners. Lacer includes both a heating/pressing station and a cooling station.

The #25 Tape Cutter is a quick and precise method for cutting laundry tapes to the proper length.

Tape Nippers can be used to cut belt ends and notch corners of the installed fastener patch to prevent edges from catching during operation.
