

EZP1 Rockline® Standard-Duty Precleaner

Simple, Quick, Effective Belt Cleaning for Cement Operations

The EZP1 Precleaner is not your average solid-blade belt cleaner that mounts on the head pulley. It features a unique single blade design that combines simple, do-it-yourself installation, quick maintenance, and effective cleaning results with a price tag that you can afford. Install the EZP1 anywhere throughout the process where dust is widespread to facilitate the capture of usable material and avoid potential safety citations for hazardous piles.

Features and Benefits

- **Works with Flexco mechanical splices.** The spring tensioner allows the blade to quickly move away from the belt when a splice passes. The polyurethane blade material easily glides over the splice without damage and with minimal cleaning disruption.
- **Compact, streamlined design.** The EZP1 Precleaner requires only 100mm (4") of horizontal clearance for correct installation. Its streamlined contours prevent material buildup on the blade or the pole.
- **Can be used on reversing belts.** Installing cleaners on both pulleys gives superior cleaning results on belts that run in both directions.
- **Fits most conveyor structures.** Available for belt widths from 300 -1800mm (12" - 72").
- **Blade can be used on other cleaners.** The Conshear™ blade can be used as a replacement blade on many OEM cleaners.
