

Far-Pul™ HD® Belt Clamp

Properly Secure Belts for Safer Conveyor Maintenance

Avoid the problems and potential dangers associated with homemade devices such as c-clamps, lumber and chains. Far-Pul™ HD® Belt Clamps are specially designed to properly secure cement belts and clamp them for safe belt conveyor maintenance.

Unique design, easily adjustable

The unique design of the Far-Pul™ HD® Belt Clamp provides even tensioning across the entire belt width for a secure grip. And with a load capacity of up to three tons (2.7 metric tons), when used with two 1-1/2-ton chain come-alongs, it is ideal for rubber covered and PVC heavy-duty belting from 6 mm (7/32") to 25 mm (1") thick.

The Far-Pul HD also accommodates a variety of belt widths. So the need to inventory different clamp bars for different belt widths is eliminated. Our pre-clamping screw allows you to slide the scissors on to the bars in a quick, efficient, and safe manner. Clamping scissors slide easily into place against both belt edges for easy adjustability. And clamp-bar pins simplify alignment and positioning.

FAR-PUL™ HD®

Belt Clamp

Far-Pul™ HD® clamp bars are constructed from heat-treated extruded aluminum so they resist corrosion and won't seize up in wet and corrosive environments. Clamps include adjustable steel scissors.
