

Light-Duty Fasteners

Lightweight Belt Splicing for Pulp and Paper

Anker® Wire Hook Fastening System

Ideal Splice for Baled Pulp and Roll Handling

The Anker® Wire Hook splice is ideal for use on lightweight belts in the baled pulp and roll handling areas of pulp and paper mills. These splices can be easily installed by the mill for quick belt changes. The double-staggered grip pattern gives wire hooks exceptional holding power without degrading the integrity of the belt carcass.

Anker Wire Hooks are machine-installed, yielding a precise, strong, and smooth splice. Several different lacers are offered to match on-site, production, or special application lacing needs. All lacers are designed with durability and speed-of-installation features built into them.

Anker Hooks can be used on belts up thru 10 mm thick and minimum pulley diameters from 24 – 175 mm.

Alligator® Staple Fastening System

Durable Splice for Pulp and Paper Mills

The Alligator® Ready-Set™ Staple Fastener System is ideal for a wide variety of light- and medium-duty fastener applications. The system features one-piece fastener strips with pre-inserted staples that speed installation and keep downtime to a minimum. They are an excellent option for mills using lightweight belts for chip handling in the woodyard and on broke belts.

Alligator Staple can be used on belts from 1.5 to 6.4 mm thick with minimum pulley diameters from 50 – 102 mm. Installation is easy with a portable, lightweight application tool that can be carried to the job for on-site installation.
