

FLEX-LOK™ Skirting System

Quickly and Easily Eliminate Load Point Spillage

The Flex-Lok™ Skirt Clamp is designed with versatility to meet the needs of any conveyor loading site—even severe, heavy loading applications. The exclusive design features a unique clamp pin with a captive wedge that can be locked in any position 360° around the pin. When properly installed, Flex-Lok ensures the skirt rubber will not rub on the belt and cause premature wear or gouging marks.

Optional limited space Mini Flex-Lok clamps available

Anti-vibration pin ensures pin remains locked

No hassle installation because skirt rubber restraining bar is held in place by clamp plates

Quick adjustment using the locking wedges on the clamp pins

Rubber thickness can vary from 8 to 25mm on Standard and 8 to 16mm on Mini

Features and Benefits

- **No belt damage.** With correct installation, the skirt rubber will not drag on the belt, causing premature wear or gouge marks in the belt cover. Such damage reduces belt cleaning efficiency and the life of the belt.
- **Safe surface access.** All installation and maintenance work can be done safely from the sides of the conveyor. Climbing into the chute to work on nuts and bolts is not required.
- **Long service life.** Flex-Lok Skirt Clamps are made of corrosion-protected components for tough duty. Replacement parts are available.
