

FLEXCO SEGMENTED TRANSFER PLATE (STP) INSTALLATION SCHOOL

Flexco STP Installation School is now available!

Attend this 2-day, instructor-led program and leave with real-world, hands-on practice installing STPs for both basic and complex conditions. Attendees at this Flexco school learn to conduct a thorough site evaluation prior to installation, and then use a training rig and kit of components to get hands-on STP installation experience. Participants also learn to troubleshoot existing installations and adjust STPs for optimal performance. Our experienced trainers incorporate decades of light-duty field experience into the program, facilitating hands-on activities that are focused on real-world challenges, solutions, and results.

AT THE NEW 2-DAY TRAINING, YOU WILL:

- Get hands-on experience installing Flexco STPs for a variety of standard and complex installation scenarios
- Practice on training rigs specifically designed to mimic real world conditions
- Troubleshoot and adjust existing STP installations to optimize conveyor performance
- Leave with installation best practices for immediate use in back on-the-job

Check out our training agenda below and sign up today!

DAY 1

- **Flexco's Segmented Transfer Plate (STP) differentiation and application**
- **Safety protocols and precautions**
- **Site evaluation and measurement**
- **Installation preparation best practices**

DAY 2
