

FLEXCO SEGMENTED TRANSFER PLATE (STP) INSTALLATION SCHOOL

Join Flexcos Light Duty experts for an engaging two-day training experience. This interactive program features real-world, hands-on practice installing STPs in both basic and complex conditions. Attendees will learn to conduct thorough site evaluations before selecting the correct product kit and installing using a specialized rig that mimics various real world conveyor alignments. Participants will also develop skills in troubleshooting existing installations and adjusting STPs for optimal performance. Our experienced trainers, with decades of light-duty field experience, lead hands-on activities focused on addressing real-world challenges, solutions, and results.

AT THE 2-DAY TRAINING, YOU WILL:

- Get hands-on experience installing Flexco STPs for a variety of standard and complex installation scenarios
- Practice on training rigs specifically designed to mimic real world conditions
- Troubleshoot and adjust existing STP installations to optimize conveyor performance
- Leave with installation best practices for immediate use in back on-the-job

Check out our training agenda below and sign up today!

DAY 1

- Flexco's Segmented Transfer Plate (STP) differentiation and application
- Flexco Segmented Transfer Plate (STP) application and solutions
