

BELT-DRIVEN BRUSH CLEANER

Power-Free, Self-Driven Cleaner for Chevron, Cleated, and Raised-Rib Belts

Belts with any surface pattern are notoriously difficult to clean. Passive brushes only knock off the large debris and motorized versions require electrical installation and controls. The Belt-Driven Brush Cleaner provides a unique alternative - a brush that spins against the belt direction to provide a better clean and drive itself off the conveyor belt using a hold-down roller and v-belt system.

Protective enclosure
removes pinch points and
protects the drive system
from material build-up.

Hold-down roller
flattens the belt and
drives the brush.

Tensioner allows quick
and simple adjustments as
the brush wears.

Uniquely patterned
polypropylene bristles
reduce material build-up.

V-Belt system uses energy from the hold-down
roller to drive the brush opposite the belt direction.

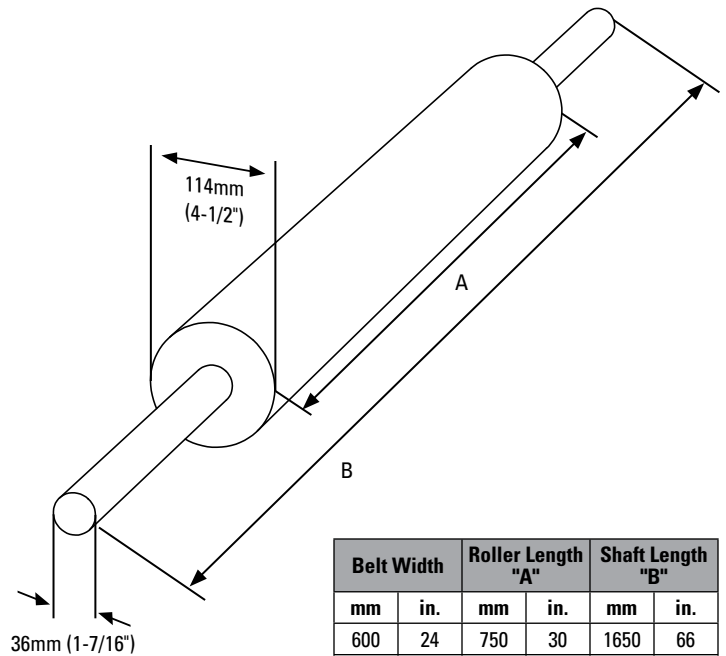

Features and Benefits

- **Self-drive system.** The assembly provides an all-in-one system that uses belt energy to drive the cleaner.
- **Maximum Cleaning.** Spins opposite the belt direction for optimal belt cleaning.
- **Uniquely patterned bristles.** Aids in reducing material buildup and clogging.
- **Adjustable Tensioners.** Allows easy brush-to-belt adjustment as the bristles wear.
- **Works on mechanically spliced or vulcanized belts.**

BELT-DRIVEN BRUSH CLEANER

Specifications and Guidelines

Belt Speed	Up to 3.5 m/s (700 fpm)
Vertical Clearance	622mm (24.5")
Horizontal Clearance	720mm (28.38")
Temperature Range	-30°C to 82°C (-20°F to 180°F)
Maximum Chevron or Cleat Height	13mm (1/2")
Bristle Length	83mm (3-1/4")
Overall Diameter	305mm (12")
Shaft Length (Brush and Roller)	Belt Width plus 1067mm (42")
Shaft Diameter	25mm (1")
CEMA Cleaner Rating	Class 4
