## How Anker®/Clipper® Hooks Work

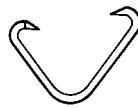

The Clipper® Hook design incorporates a double-staggered grip pattern that gives wire hooks exceptional holding power without degrading the integrity of the belt carcass. The points of the fastener pass through the belt carcass and are formed over, locking the carcass between them.

This low profile splice is highly compatible with conveyor components and compliant with the need for reduced operating noise. Additional splice strength and consistency of splice installation is obtained through precision machine application.

Applications	Installation Method	What You Need for Installation
<ul style="list-style-type: none"> <li>• Package and Parts Handling</li> <li>• Food Processing</li> <li>• Checkout Counters</li> <li>• Commercial Laundries</li> <li>• Filter Media</li> <li>• Agriculture</li> </ul>	Depending on the application, Clipper® Hooks can be installed with on-site maintenance lacers such as the Roller Lacer®, Roller Lacer® Gold Class™, or Microlacer®, Production Lacers for high volume lacing (Pro 400, Pro 600, Pro 6000, or Electric Hydraulic Lacers), or Specialty Lacers such as the Plier-Tape Lacer, Vice Lacer, Baler Belt Lacer. Please contact Flexco to discuss your application.	<ul style="list-style-type: none"> <li>• Hooks</li> <li>• Connecting Pin</li> <li>• Installation Tool</li> </ul>
How to Specify the Correct Clipper® Fastener	Fastener Metal Selection	Hinge Pin Selection
<ol style="list-style-type: none"> <li>1. Measure your Belt Thickness (kN/m, PIW).</li> <li>2. Measure the Diameter of the Smallest Pulley in your Drive with Belt Wrap more than 90°.</li> <li>3. Using the selection chart on page 6, identify possible hook choices.</li> <li>4. Narrow selections by selecting desired wire diameter. <ul style="list-style-type: none"> <li>• Larger wire diameter provides greater strength and abrasion resistance.</li> <li>• Smaller wire diameter provides less noise and less wear on conveyor components.</li> </ul> </li> <li>5. If multiple choices remain, select either carded or Unibar® style fastener.</li> </ol>	<p><b>Galvanized Steel.</b> For basic applications, galvanized steel is recommended.</p> <p><b>Stainless Steel.</b> Type 430 and Type 316 Stainless Steel offers more resistance than steel to abrasion, acids, chemicals, rusting, and magnetic attraction.</p> <p><b>High Tensile.</b> Added abrasion resistance and fastener retention strength.</p> <p><b>Specialty Metal.</b></p> <ul style="list-style-type: none"> <li>• Coated Steel</li> <li>• Rectangular High Tensile</li> <li>• Monel®</li> <li>• Inconel®</li> <li>• Phosphor Bronze</li> <li>• Hastelloy</li> <li>• Black Oxide</li> </ul>	<p><b>DSS DuraStainless™</b> - stainless spring steel core with filled nylon coating for superior abrasion resistance, flat belts only.</p> <p><b>DL Duralink™</b> - braided stainless cable with filled nylon coating for superior abrasion resistance, crowned pulley or troughed belts.</p> <p><b>NY Nylosteel</b> - spring steel core with nylon coating for use with galvanized or high tensile fasteners, flat or troughed belts.</p> <p><b>NYS Nylostainless</b> - stainless spring steel core with nylon coating for use with stainless steel fasteners, flat belts only.</p> <p><b>NCS Nylon Covered Stainless Steel Cable</b> - braided stainless cable with nylon coating for applications with stainless fasteners, crowned pulley or troughed belts.</p>

Please see page 8 for Anker®/Clipper Fastener selection chart.

# General Hook Information

## HOW TO SELECT THE PROPER HOOK SIZE

1. Measure the belt thickness and pulley diameter.
2. Determine the possible options that could be used, based on the chart on page 10.
3. Select the proper hook from the specification chart.
4. If hook specifications overlap into more than one size, select the fastener which best meets your needs. NOTE: If maximum strength is of primary importance, choose the hook with the largest diameter wire. If low profile is needed select the hook with the smallest diameter wire.
5. Select the type of metal which best fits your application requirements.

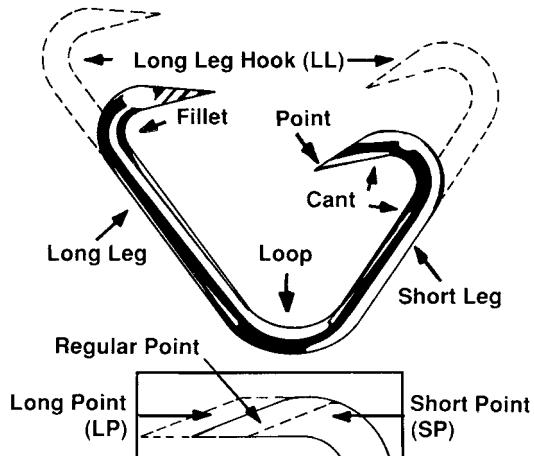

## SPECIAL LENGTH CARDS

Anker®/Clipper® hooks can be ordered in special length cards or Unibar® strips for specific applications.

This eliminates time consuming card cutting by hand.

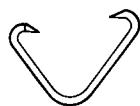

All special length cards are shipped without pins.

Please call Customer Service for pricing and lead times.

## FASTENER MATERIAL CHARACTERISTICS

METAL	MAGNETIC	ABRASION RESISTANCE	CHEMICAL RESISTANCE	RUST RESISTANCE	SPARKING/ NON-SPARKING	AVAILABLE CLIPPER SIZES

## How Clipper® G Series™ Lacing Works

Clipper® G Series™ Lacing is precision-stamped belt lacing from 316L stainless steel, ensuring a consistent 4.00 mm pitch over the entire length of the lace. The staggered leg geometry features four alternating point levels between the top and bottom of the lace which provides varying points of penetration

versus a continuous line, increasing the strength and durability of the splice.

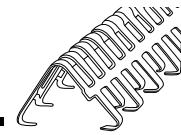

G Series is machine-applied for consistent compression, resulting in a uniform and flat splice, even with belts that are prone to belt wave. Corrugated stainless steel hinge pins prevent migration during use.

Applications	Installation Method	What You Need for Installation
<ul style="list-style-type: none"> <li>• Food Manufacturing</li> <li>• Agriculture Equipment</li> <li>• Package and Parts Handling</li> <li>• Filter Media</li> <li>• Slider Bed Systems</li> </ul>	Clipper G Series Lacing can be installed with the Pro 600 or 6000 production lacers, Roller Lacer®, Roller Lacer® Gold Class™, or with a Clipper® Microlacer®.	<ul style="list-style-type: none"> <li>• G Series Lacing</li> <li>• Hinge Pin</li> <li>• Installation Tool</li> <li>• G Series Face Strip or Comb</li> </ul>
<b>How to Specify the Correct G Series™ Lacing</b>	<b>Fastener Metal Selection</b>	<b>Hinge Pin Selection</b>
<ol style="list-style-type: none"> <li>1. Measure your Belt Thickness.</li> <li>2. Measure the Diameter of the Smallest Pulley in your Drive with Belt Wrap more than 90°.</li> <li>3. Choose the fastener size that is appropriate for your specifications in the selection chart below.</li> </ol>	<b>Stainless Steel.</b> Type 316 Stainless Steel offers more resistance than galvanized steel to abrasion, acids, chemicals, rusting, and magnetic attraction.	<b>CSSP</b> <b>Corrugated Stainless Steel</b> - for all sizes of G Series belt lacing.

## How Clipper® Patch Fastener Hooks Work

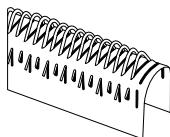

Clipper® Laundry Patch Fasteners are manufactured from double-flattened wire which increases the holding ability as well as the transverse stability of the individual hooks, providing a flat and even splice area. The hook points are horizontally-cut, ensuring that they are bent accurately down towards the belt edge, which is especially important for thin belts used in laundry feeder and folding machine applications.

Available in either galvanized or 316L stainless steel, the hooks are integrated into the polyester patch material and are pre-cut to belt widths with leading and trailing ends. The patch is available with a custom logo if desired. Corrugated Perlon hinge pins are included with each box of fasteners, are corrosion-free, and provide lubrication to the splice joint.

Applications	Installation Method	What You Need for Installation
• Commercial Laundries	Clipper Patch Fastener Hooks can be installed with the Pro 120 on-site maintenance lacer or the Pro 150 production lacer.	<ul style="list-style-type: none"> <li>• Patch Fastener Hooks</li> <li>• Connecting Pin</li> <li>• Installation Tool</li> </ul>
<b>How to Specify the Correct Clipper® Fastener</b>	<b>Fastener Metal Selection</b>	<b>Hinge Pin Selection</b>
<ol style="list-style-type: none"> <li>1. Measure your Belt Thickness.</li> <li>2. Measure the Diameter of the Smallest Pulley in your Drive with Belt Wrap more than 90°.</li> <li>3. Choose the fastener width that is appropriate for your specifications.</li> </ol>	<b>Galvanized Steel.</b> For basic applications, galvanized steel is recommended.  <b>Stainless Steel.</b> Type 316 Stainless Steel offers more resistance than galvanized steel to abrasion, acids, chemicals, rusting, and magnetic attraction.	<b>CP Corrugated Perlon.</b>

## How Alligator® Lacing Works

Hammer applied Alligator® Lacing utilizes a design with teeth that are formed so that when they are driven parallel to the length of the belt, the vital longitudinal carcass fibers are not severed.

The compression fit of the connecting bar provides a strong, vise-like hold on the belt

and distributes belt tension evenly across the entire belt width. The one-piece fastener strip also ensures that there are no loose pieces to work themselves out of the belt and into the conveyed product. The flat splice obtained with a continuous strip of lacing also helps with hinge pin insertion.

Applications	Installation Method	What You Need for Installation
<ul style="list-style-type: none"> <li>Manufacturing Assembly Lines</li> <li>Food, Package, and Parts Handling</li> <li>Checkout Counters</li> <li>Agricultural Equipment</li> </ul>	Requires only a hammer; no special tools needed. Unique, patented clips and round gauge rod act as an "extra" pair of hands.	<ul style="list-style-type: none"> <li>Fasteners</li> <li>Hinge Pin</li> <li>Hammer</li> </ul>
How to Specify the Correct Alligator® Lacing	Fastener Metal Selection	Hinge Pin Selection
<ol style="list-style-type: none"> <li>Determine Belt Tension (kN/m, PIW).</li> <li>Measure your Belt Thickness.</li> <li>Measure the Diameter of the Smallest Pulley in your Drive with Belt Wrap more than 90°.</li> <li>Choose the fastener size that is appropriate for your specifications in the selection chart below.</li> </ol>	<b>Steel.</b> Standard fastener material. <b>Stainless Steel.</b> Type 316 Stainless Steel	<b>H</b> <b>Steel Corrugated</b> - for all sizes of Alligator belt lacing. <b>SH</b> <b>Stainless Steel Corrugated</b> - for all sizes of Alligator belt lacing. <b>RH</b> <b>Rocker Hinge Pin</b> - for transmission belt lacing, two-piece pin to reduce friction and wear on loops and lacing. <b>NC</b> <b>Nylon Covered Steel Cable</b> - for easier hinge pin insertion. <b>NCS</b> <b>Nylon Covered Stainless Cable</b> - for greater corrosion resistance.

## How Alligator® Staple Fasteners Work

Designed for light and medium duty synthetic carcass belting, the Alligator® Staple fastener utilizes high tensile, stainless steel staple attachment, in conjunction with an extended plate design. This design separates the point of fastener penetration from the line of belt flexing to eliminate splice fatigue at the point of belt attachment. Staple fasteners are furnished in strips with a bridge between each fastener plate. This strip design minimizes the chance of individual parts dislodging into the conveyed product. The one piece design provides a

stronger splice, greater resistance to impact damage, and a smoother, unripped joint that simplifies hinge pin insertion.

Staples are hammer driven through the fastener and belt, working between the carcass fibers without severing them. The staples are then clinched cross-wise to the belt, so that belt tension does not pull against the staples to unclinch them.

Applications	Installation Method	What You Need for Installation
<ul style="list-style-type: none"> <li>• Package and Parts Handling</li> <li>• Cased Goods</li> <li>• Food</li> <li>• Wood</li> <li>• Agricultural Products</li> </ul>	A portable, lightweight application tool is easily carried to the job for on-site installation. The tool holds belt and fastener while staples are set with a hammer and a staple driver.	<ul style="list-style-type: none"> <li>• Fasteners</li> <li>• Hinge Pin</li> <li>• Installation Tool</li> <li>• Staple Driver</li> <li>• 0.5 kg (1 lb.) ## How Alligator® Rivet Fasteners Work

The Alligator® Rivet Fastener system uses the self-setting rivet technology that Flexco developed for the underground mining market. The patented rivets work between the carcass fibers, without severing them, leaving the entire belt carcass intact. The fasteners and rivets of this system are constructed from durable, abrasion-resistant stainless steel for long life.

Because the rivets are self-setting, fasteners are installed quickly from the top side of the belt. Rivets are driven through the fastener plates and the belt, passing between the carcass fibers. The specially-shaped head of each pilot nail works in conjunction with the application tool's anvil plate to set the rivets.

Applications	Installation Method	What You Need for Installation
Hay Baling	Fasteners are installed in one simple procedure with self-setting rivets, using a portable fixture and hammer.	<ul style="list-style-type: none"> <li>• Fasteners</li> <li>• Rivets</li> <li>• Hinge Pin</li> <li>• Installation Tool</li> <li>• 0.5 kg (1 lb.) Hammer</li> </ul>
How to Specify the Correct Alligator® Rivet Fastener	Fastener Metal Selection	Hinge Pin Selection
Fits most round hay balers. Contact Customer Service for more information.	<b>Stainless Steel.</b> Type 300 Series Stainless Steel.	<b>Steel Corrugated</b> - the standard metal pin. Corrugations retain pin within the splice. <b>Stainless Steel Spring Wire</b> - resists wear and corrosion.

350 mm (14") Installation Kit	ARTK-14	15015	8.4

## COMPLETE TOOL KITS - MULTIPLE RIVET INSTALLATION TOOL

Each kit includes a multiple rivet installation tool, guide block with screws, two pneumatic punches, hand punch and air hammer. Packaged in a durable plastic tool box.

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. KGS.
175 mm (7") Installation Kit	MARTK-7	15032	7.5
350 mm (14") Installation Kit	MARTK-14	15033	8.9

**NOTE:** When using the pneumatic punch, air pressure not to exceed 85 psi.

## How Alligator® Non-Metallic Fasteners Work

Alligator® Non-Metallic Fasteners are made up of two distinct product lines, the Alligator® Plastic Rivet System and the Alligator® Spiral Lace Fastener System.

The **Alligator® Plastic Rivet Fasteners** were developed to bring the many advantages of mechanical belt fasteners to those applications where metal belt fasteners could not be used. They are external, cover-mounted fasteners employing a one-piece, integrated design with rivets molded into the top plates of the fasteners.

These rivets pass through pre-punched holes and are formed over through our Spin-Set™ technology, compressing the fastener plates and finishing the splice.

The **Alligator® Spiral Lace Fastener** system was designed for small pulley, low-profile applications. The fastener is constructed of polyester webbing, spirals, and hinge pins. It is installed by either insertion between the plies, ply stepping, or finger splicing.

Applications	Installation Method		What You Need for Installation

## How Alligator® V-Belt Fasteners Work

The Alligator® V-Belt Fastening System is designed to grip the ends of a v-belt without interfering with the sheaves (pulleys) that the belt passes around.

Staples or nails are driven through the fastener and belt and folded over. They are

then hammered tight against the bottom plate of the fastener clinching the belt between the fastener plates. There is nothing that protrudes beyond the sides of the belt that would interfere with the sheaves.

Applications	Installation Method	What You Need for Installation
<ul style="list-style-type: none"> <li>• Power Transmission</li> <li>• Agricultural Harvesting</li> <li>• Manufacturing</li> </ul>	These fasteners are inserted into a holder/tool along with the belt end. The staples/nails are driven through the splice and when complete, the entire assembly is removed from the holder. Insert the hinge and the belt is ready to be run.	<ul style="list-style-type: none"> <li>• Fasteners</li> <li>• Hinge Pin</li> <li>• Staples/Nails</li> <li>• Holder/Tool</li> <li>• Rocker Pin Tools</li> <li>• 0.5 kg (1 lb.) Hammer</li> </ul>
<b>How to Specify the Correct Alligator® V-Belt Fastener</b>	<b>Fastener Metal Selection</b>	<b>Hinge Pin Selection</b>
The fastener size is determined by the belt size that you use. Simply choose the fastener that corresponds to your belt, A312, B437, or C531.	<b>Steel.</b> Standard fastener material.	Rocker Pins are included with the fasteners.

## Novitool® General Information

The Novitool® line of belt fabrication equipment is designed to enhance productivity in the workshop and on-site. Intended for use with light and medium weight thermoplastic conveyor belting, each splicing press, ply-separator, and punch employs market-driven innovations.

The quality build and contemporary design of Novitool® products are recognized worldwide. Experienced belt fabricators will appreciate the simplicity of operation and premium finished results, which are standards of all Novitool® products.

## FGP Food Grade Primary Cleaner General Information

The FGP Food Grade Primary Cleaner from Flexco is easy to install, easy to maintain, and disassembles in a snap for regular cleaning and sanitization. The FGP Primary Cleaner works on any belt from 100 mm to 1500 mm (4" to 60") and the blade is available in both white and blue FDA approved food grade material.

### Features and Benefits

- Made of FDA approved materials for use in food applications.
- Certified by USDA for use in meat, poultry and dairy operations.
- Simple design limits crevices and opportunities for bacteria growth.
- Snap on/off blade for ease of cleaning and blade replacement.
- Minimal hardware so installation, tensioning, and blade replacement are easy.
- Easily tensioned to minimise blade wear, eliminate belt damage, and maximise cleanability.
- Available in standard blade widths from 300 mm to 1500 mm (12" to 60"). Can be cut to size.
- C-dimension gauge ensures proper pole location for optimal cleaning.
- Compatible with endless as well as mechanical splices.

### Specifications:

<b>Temperature Range</b> UHMW: -29°C to 60°C (-20°F to 140°F) Dual Durometer: 0°C to 60°C (+32°F to 140°F)	<b>Blade Height</b> 76 mm (3.0")	<b>Blade Hardness</b> UHMW: 63D Shore Hardness Urethane: 85A Shore Hardness	<b>Blade Material</b> Food-grade UHMW, UHMW with Stainless Steel, or Urethane with PVC
<b>Pulley Diameter Range</b> 50 mm (2") to 267 mm (10.5")	<b>Blade Width Range</b> 102-1524 mm (4" - 60")	<b>Pole/Mounting Material</b> 304 Stainless Steel	

### How to choose the correct size blade for your conveyor:

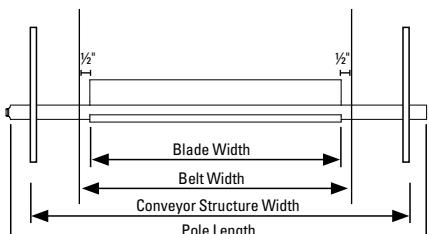

1. Measure your belt width.
2. Choose the Blade Width that corresponds to your belt width.
3. Measure your conveyor width.
4. Verify the Maximum Conveyor Width shown in the selection chart is larger than your conveyor width. If your conveyor width is smaller than the maximum width shown, choose the next larger blade width that accommodates your conveyor width.
5. Blade and/or pole can be cut to users required length. Pole must be 50.8 mm longer than the outside width of conveyor structure at the mounting location.

# FGP Food Grade Primary Cleaner

**Product Notes:**

- Pole length = blade length + 12" on standard cleaners.
- Blade and/or pole can be cut to users required length.
- Pole must be 2" longer than the outside width of the conveyor structure at the mounting location.

## FGS Food Grade Secondary Cleaner General Information

The FGS Food Grade Secondary Cleaner from Flexco is easy to install, easy to maintain, and disassembles in a snap for regular cleaning and sanitization. The FGS Secondary Cleaner works on any belt from 300 mm to 1828 mm (12" to 72") and the blade is available in both white and blue FDA approved food grade material.

### Features and Benefits

- Made of FDA approved materials for use in food applications.
- Verified by BISSC for use in industrial baking operations.
- Compliant with EU 1934/2004 food contact requirements.
- Simple design limits crevices and opportunities for bacteria growth.
- Snap on/off blade for ease of cleaning and blade replacement.
- Minimal hardware so installation, tensioning, and blade replacement are easy.
- Easily tensioned to minimize blade wear, eliminate belt damage, and maximize cleanability.
- Available in standard blade widths from 300 mm to 1800 mm (12" to 72"). Can be cut to size.
- Installation gauge ensures proper pole location for optimal cleaning.
- Compatible with endless as well as mechanical splices.
- Includes installation side plates, standoffs and necessary hardware.
- Available with dual tensions for cleaners with blades above 1220 mm (48").

### Specifications:

<b>Temperature Range</b> UHMW: -29°C to 60°C (-20°F to 140°F) Dual Durometer: 0°C to 60°C (+32°F to 140°F)	<b>Blade Height</b> UHMW: 50 mm (2.0") Dual Durometer: 76 mm (3.0")	<b>Cleaner Construction Material</b> Solid 304 Stainless Steel  <b>Blade Hardness</b> UHMW: 63D Shore Hardness Urethane: 85A Shore Hardness	<b>Blade Material</b> Food-grade UHMW, UHMW with Stainless Steel, or Urethane with PVC
--	---	--	---

### How to choose the correct size Cleaner for your conveyor:

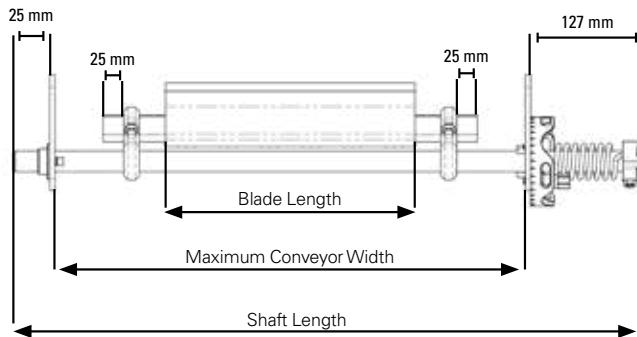

1. Measure your belt width.
2. Choose the Blade Length that corresponds to your belt width.
3. Measure your conveyor outside to outside width.
4. Verify the Maximum Conveyor Width shown in the selection chart is larger than your outside to outside conveyor width. If your conveyor width is larger than the maximum width shown, choose the next larger Blade Length that accommodates your conveyor width.
5. Blade, blade support bar, and shaft can be cut to users required length. Shaft must be 150 mm (6") longer than the outside width of conveyor structure at the mounting location. For cleaners that are 1372 mm (54"), shaft must be 305 mm (12") longer than the outside width of the conveyor structure at the mounting location.

## Light-Duty Transfer Solutions General Information

When it comes to belt-to-belt transfer of product, Flexco understands the importance of a trouble-free transition.

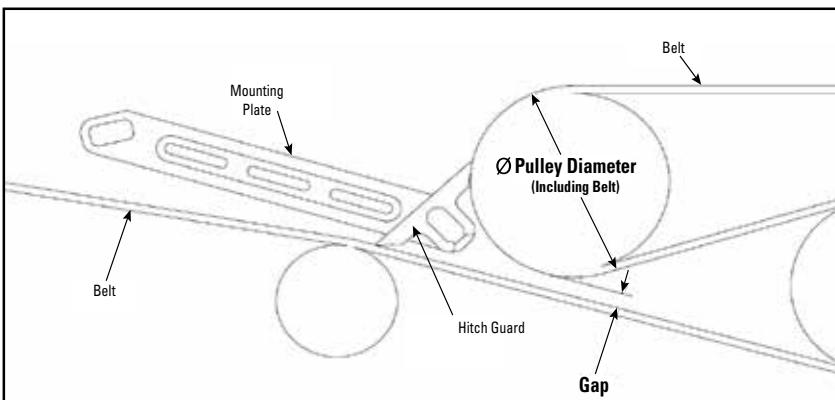

The Hitch Guard from Flexco is engineered to provide a smooth transition of product over the conveyor hitch. The Hitch Guard prevents small objects from becoming lodged between the belts at the hitch which can cause longitudinal conveyor belt tears, damage to conveyed products, and costly periods of unscheduled downtime.

Segmented Transfer Plates offer similar protection at transition points. Designed to accommodate belts up to 1500 mm (60") wide, different segment lengths can be paired together to provide options for offset mounting and accommodate gaps from 100 mm to 250 mm (4" to 10").

Both Hitch Guards and Segmented Transfer Plates are designed for individual segments to release from the support bar, so that objects are quickly dislodged while remaining segments stay secured for continued operation.

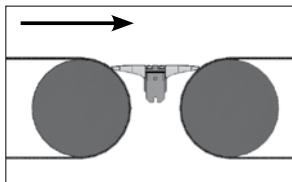

### Hitch Guard Ordering Specifications:

Pulley Diameter (mm) (including belt)	63.5	76.2	88.9	101.6	114.3	127.0	139.7	152.4	165.1
Minimum Gap Required (mm)	20.3	12.7	2.5	0	0	0	0	0	0
Maximum Gap (mm) (mounting plate installed above belt)	40.6	35.6	30.5	25.4	20.3	15.2	10.2	5.1	0

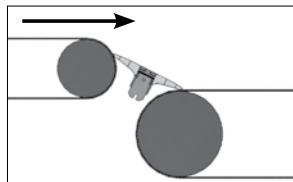

### Segmented Transfer Plate Ordering Specifications:

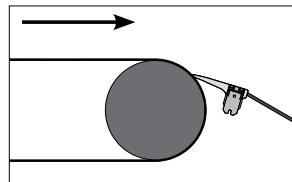

1. Specify belt width. Mounting bar is 50 mm (2") longer than specified belt width.
2. Determine transfer size required.
3. Determine mounting bar location and if offset is required.

**For horizontal to horizontal belt applications.**  
Measure distance between pulleys at a point 12 mm to 38 mm (0.5" to 1.5") below the tops of the pulleys (including belt thickness).

**For waterfall applications.**  
Measure distance from about 45° from the top of the upper pulley to the top point on the lower pulley.

**For belt to chute or slide applications.**  
On pulley side, position no higher than 12.7 mm (1/2") below the crown with bridge segment positioned roughly 3.2 mm to 12.7 mm (1/8" to 1/2") above the top of the chute or slide back wall.

## Tatch-A-Cleat® General Cleat Information

### Cleat patterns

When choosing cleat installation patterns, you should give major consideration to the type of return support which is available or feasible.

Where conveyor pulley center distances are 5M (15 feet) or less, it is often possible to omit return rolls safely.

Where the curved or chevron pattern is used with standard return rolls, cleats

should be arranged so that they provide a set of continuous contacts between cleats and rolls. On drives using pulleys less than 150 mm (6") in diameter, curved or chevron patterns should not be used.

The ends of cleats mounted in a curved pattern should be tapered to lead smoothly onto return rolls.

### Suggested minimum cleat height for various sized materials and degrees of incline

This chart assumes that material being conveyed has a 30° natural angle of repose. For rounded or free-flowing materials with a natural angle of repose of less than 30°, use the cleat corresponding to the next higher material size. (For example, if your material is 100 mm (4") high, with a natural angle of repose of less than 30°, and your belt incline is 40°, you would use a 75 mm (3") cleat — that is, the cleat size corresponding to 125 mm (5") material.)

#### Cleat Height

#### Belt Incline

### Suggested cleat spacing

This chart assumes that material being conveyed has a 20° dynamic angle of repose (30° natural angle of repose) and that cleats are installed at a right angle to the belt edge. For more free-flowing material, use slightly closer cleat spacing.

#### Cleat Spacing

Cleat Height	mm	in.	mm	in.	mm	in.	mm	in.	mm	in.
	150	6"	875	35"	700	28"	525	21"	394	15 3/4"
100	4"	575	23"	463	18 1/2"	338	13 1/2"	263	10 1/2"

25	1"	138	5 1/2"	107	4 1/4"	69	2 3/4"	63	2 1/2"	
16	5/8"	100	4"	69	2 3/4"	50	2"	44	1 1/4"	
	30°		40°		50°		60°			

#### Belt Incline

Type	Cleat Pattern	Return Rolls	Recommended
IN TROUGH			Where Cleats are needed only to lock material in place on the conveyor.
STAGGERED			Where drain-off of liquids presented special problems.
ACROSS BELT WIDTH			Where incline is steep and/or material has high flowability – as with large, round or uniformly sized material.
CURVED			Where increased load capacity is required with a given belt width, trough, and incline.
SPLIT			Where drain-off is a problem, and rubber disc-type rolls are available.
CHEVRON			Where drain-off is a problem, and standard solid return rolls are used.

T-Cleat, Scoop Cleats, V-Guides		-28°C to +65°C (-20°F to +150°F)	

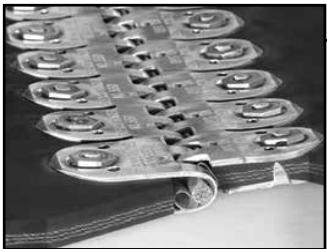

NOTE: One reel or carton minimum per size and color.

Non Listed Items are available.

Request quote for price and delivery.

NOTE: Customized Profiles and Formulations can be quoted.

NOTE: Allow for greater pulley diameters if system has reverse bends.

## How Flexco® Bolt Hinged Fasteners Work

Flexco® Bolt Hinged fasteners provide a flexible joint for belts operating over small pulleys. Because the joint is easily separated by simply removing the hinge pin, entire belt sections may be added or eliminated.

Designed as a compression fastener, the Flexco® Bolt Hinged model is fastened to the belt ends with high strength bolts. The bolts

compress the plates into the belt cover. Additional holding capability is provided by the fastener teeth that imbed in the belt without damage to the belt carcass.

This combination distributes the splice tension across the entire plate width while the teeth secure the fastener into the belt carcass to resist pull-out.

Applications	Installation Method	What You Need for Installation
<ul style="list-style-type: none"> <li>• Construction Equipment</li> <li>• Road Machinery</li> <li>• Coal, Salt, Potash Mines</li> <li>• Stacking and Stockpiling Belts</li> <li>• Other Applications Involving Smaller Pulleys</li> </ul>	Fasteners can be installed in the shop or on-site with either simple hand tools or power tools.	<ul style="list-style-type: none"> <li>• Fastener Plates</li> <li>• Bolts &amp; Nuts</li> <li>• Templet</li> <li>• Belt Punch</li> <li>• Wrench</li> <li>• Bolt Horn</li> <li>• Flexco Installation Tool</li> <li>• Impact Tool or Carpenter's Brace</li> </ul>
How to Specify the Correct Flexco® Bolt Hinged Fastener	Fastener Metal Selection	Hinge Pin Selection
<ol style="list-style-type: none"> <li>1. Determine Belt Tension (PIW).</li> <li>2. Measure your Belt Thickness after skive.</li> <li>3. Measure the Diameter of the Smallest Pulley in your Drive with Belt Wrap more than 90°.</li> <li>4. When using self-cleaning wing pulleys, subtract 20% of the overall diameter to calculate the minimum pulley diameter.</li> <li>5. Choose the fastener size that is appropriate for your specifications in the selection chart below.</li> </ol>	<p><b>Steel.</b> For most applications, plated steel is recommended.</p> <p><b>Stainless Steel.</b> Type 316 Stainless Steel provides extra resistance to abrasion, magnetic attraction, and corrosion from acids and chemicals.</p>	<p><b>NC Nylon Covered Steel Cable</b> - for use with steel fasteners, flat or troughed belts.</p> <p><b>NCS Nylon Covered Stainless Steel Cable</b> - for applications with stainless fasteners, flat or troughed belts.</p>

## FASTENERS

### NOTE:

*In most cases, fastener strip length is not equal to belt width. Order by belt width.*

### Exclusive Piloted Bolt Design Simplifies Installation:

*The new piloted bolt is currently being phased in to replace standard bolt designs.*

*To order the new piloted bolts as they become available, use standard bolt ordering numbers.*

### "J" CARTON

#### CARTON CONTENTS:

- 2 Strips of fastener
- 1 Gauge Pin
- 2 Pieces Filler Tubing
- 2 Hinge Pin Washers
- 1 Hinge Pin
- Required amount of clips for individual Plate "J" Cartons
- Required amount of nuts and bolts

Stock Items (non-shaded)

Made To Order Items (shaded). Contact Flexco for lead times, minimum order may apply.

## How Flexco® Rivet Hinged Fasteners Work

Designed for synthetic carcass belting as well as other styles of belt, Flexco® SR™ (Self-Setting Rivet) Fasteners utilize multiple rivet attachment. This provides maximum resistance to pull-out and allows the patented rivets to work between the carcass fibers without severing them, leaving the entire belt carcass intact. It does not rely solely upon the carcass material to resist pull-out.

Because the rivets are self-setting, fasteners are installed quickly from the top side of the

belt. Rivets are driven through the fastener plates and through the belt, passing between the carcass fibers. The specially-shaped head of each pilot nail works in conjunction with the applicator tool's anvil plate to set the rivets.

The same hammer blows that set the rivets also compress the fastener plates into the belt cover. The broad width and heavy gauge of the plates give extended wear life. These plates compress uniformly and are specially coined so there are no high spots or edges to hang up.

Applications	Installation Method	What You Need for Installation

# Flexco® SR™ Scalloped Edge™ Rivet Hinged Fasteners

## POWER INSTALLATION TOOLS

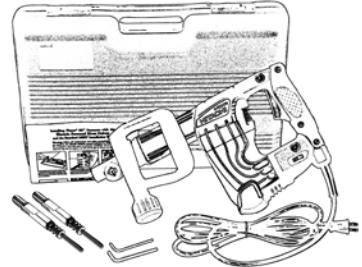

*Please apply BCP discounts for all maintenance and installation tools found in this handbook.*

### ELECTRIC POWERED RIVET DRIVER KIT\*

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. KGS.
Standard Kit*	EPRDVSK-1	41943	3.1
Replacement Drive Rod	EPRDSS-DR	42083	0.7

\*Kit includes Driver, two Custom Drive Rods, Convenient Carrying Case

- For use with standard 110 volt electric
- Works with standard MSRT application tool and guide block

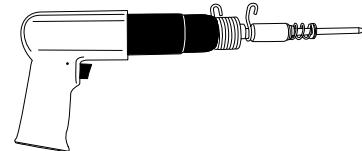

### AIR POWERED RIVET DRIVER\*

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. KGS.
Air Powered Rivet Driver-Complete*	PTRDK	41835	1.0
<b>REPLACEMENT PARTS</b>			
Air Powered Rivet Driver	PTAH	41834	0.1
Retaining Spring	PTRD-RS	41837	0.05
Drive Rod with Hold Down Spring and Washer	PTRD-DR	41777	0.2
Hold Down Spring and Washer	DR-SW	41836	0.02

\* Includes Air Powered Rivet Driver, Retaining Spring, and Drive Rod with Hold Down Spring and Washer.

- Requires a minimum 90 psi for operation
- Works with standard MSRT application tool and guide block

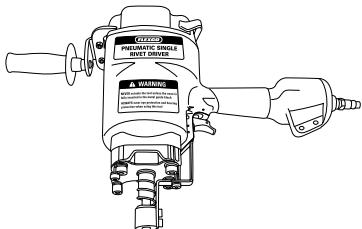

### PNEUMATIC SINGLE RIVET DRIVER\*

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. KGS.
Pneumatic Single Rivet Driver*	PNEUDRIVE1	41992	20.0
5 Rivet Pattern SR™ Steel Guide Blocks	35RD-GB5-4	42000	4.5
8 Rivet Pattern SR™ Steel Guide Blocks (For installation of R8 or R9)	35RD-GB8-4	41998	5.4
Nose Piece	PDNP	41999	1.4
Nose Piece Safety	PDNPS	42036	0.4
Tool Bumper	PDBUMP	42037	0.2
O-Ring Kit	PDORING	42038	0.1
Handle	PDHANDLE	42039	0.1
HARDWARE Kit-screws	PDHK	42040	0.3
CYLINDER	PDCYL	42041	0.5
Nose Spring	PDNSS	42042	0.05
Piston Rod	PDPR	42043	0.5
Trigger Valve	PDTVA	42044	0.05
Regulator Kit	FPD-RK	43008	3.5
Air Hose Assembly	PSRD-AH	42522	1.7

\*Includes one Pneumatic Single Rivet Driver, one Regulator, one Airhose, Instruction Manual, and Safety Glasses.

- Works with standard MSRT application tool
- Works with steel guide blocks – sold separately
- Works with Rapid Loader™ Rivet Strips with washers

## How Flexco® Bolt Solid Plate Fasteners Work

Strength of this fastener is derived from the compression of the plates, mounted above and below the belt, with high tensile strength bolts. This "compression" distributes the splice tension across the full width of each fastener plate. The holding ability is, thereby, increased by not solely relying upon the bolts to resist pull-out. Additional strength and resistance to pull-out is obtained from the specially formed teeth on each plate. These teeth imbed deep into the belt carcass, without damaging the carcass fibers.

A tight butt splice is achieved through the exaggerated bolt hole spacing in the templet which forces the belt end together. Flexco® Bolt Solid Plate Fasteners permit natural conformance with troughing or transition idlers.

140, 190 and 2-1/2 size fasteners are specifically designed for thinner belting, allowing increased compression, greater reach-back, and more fastener plates per belt width.

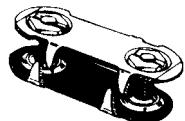

Applications	Installation Method	What You Need for Installation
Higher-tension main haulage belts in <ul style="list-style-type: none"> <li>• Coal</li> <li>• Hard-Rock Mining</li> <li>• Foundries</li> <li>• Grain Elevators</li> <li>• Aggregate Plants</li> <li>• Steel Mills</li> </ul>	Holes are punched in belt quickly and accurately with a templet and boring tool. Fasteners are installed on-site with portable, hand, or power tools.	<ul style="list-style-type: none"> <li>• Fastener Plates</li> <li>• Bolts &amp; Nuts</li> <li>• Templet</li> <li>• Belt Punch</li> <li>• Wrench</li> <li>• Bolt Horn</li> <li>• Flexco Installation Tool</li> <li>• Impact Tool or Carpenter's Brace</li> </ul>
<b>How to Specify the Correct Flexco® Bolt Solid Plate Fastener</b> <ol style="list-style-type: none"> <li>1. Determine Belt Tension (kN/m, PIW).</li> <li>2. Measure your Belt Thickness after skive.</li> <li>3. Measure the Diameter of the Smallest Pulley in your Drive with Belt Wrap more than 90°.</li> <li>4. When using self-cleaning wing pulleys, subtract 20% of the overall diameter to calculate the minimum pulley diameter.</li> <li>5. Choose the fastener size that is appropriate for your specifications in the selection chart below</li> </ol>	<b>Fastener Metal Selection</b> <p><b>Steel.</b> For most applications, plated steel is recommended.  <b>MegAlloy®.</b> For superior resistance to wear and abrasion.  <b>Stainless Steel.</b> Type 316 Stainless Steel provides extra resistance to abrasion, magnetic attraction and corrosion from acids and chemicals.  <b>Everdur®.</b> Spark-free material compared to steel and fully non-magnetic.  <b>Flexco®VP™.</b> Rubber covered steel top plates.</p>	<b>Hinge Pin Selection</b> <p>No Hinge Pin Required.</p>

### Flexco® Bolt Solid Plate Fastener Selection Chart

Fastener Size	Fastener Rating		Belt Thickness Range		Recommended Min. Pulley Diameter When installing a 45 degree splice the minimum pulley diameter is reduced by 25%.			
	For Belt Tension Rating Up To:	For Belt Strength Up To:	Measured After Skive		Operating Tension 75-100% of Fastener Rating		Operating Tension Under 75% of Fastener Rating	
			PIW	kN/m	mm	in.	mm	in.

## How Flexco® XP™ Staple Fasteners Work

The Flexco® XP™ Staple Fastening System combines an enhanced applicator tool with the longest wearing staple fastener and hinge pin on the market to produce a superior belt splice for tough mining environments. Designed for use with solid woven PVG/PVC belting as well as other styles of belt.

Flexco® XP™ Staple Fasteners offer a smooth, low-profile that makes them compatible with belt cleaners and other conveyor components.

The Flexco XP Staple Fastening System is designed to set one fastener at a time

so misdrives and tool jams are infrequent, regardless of whether you are installing with a manual or power applicator.

An integrated guide plate makes loading heavy belts easier and the easily transported frame and applicator are built for durability and ease of use. One smooth motion of the handle or lever compresses the plate, then drives and folds the staples for the same consistent staple set and finished splice profile each and every time. The larger loop area in the staple accepts a bigger hinge pin for extended splice life.

Applications	Installation Method	What You Need for Installation
Underground mining <ul style="list-style-type: none"> <li>• Coal              • Potash</li> <li>• Salt              • Gypsum</li> </ul>	Fasteners can be installed with a manual or power applicator and tool frame.	<ul style="list-style-type: none"> <li>• Fastener</li> <li>• Hinge Pins</li> <li>• Flexco Installation Tool</li> <li>– Manual</li> <li>– Pneumatic</li> <li>– Hydraulic</li> </ul>
