

# EZ-AIR KIT

## Air Tensioning System

## No Fuss Air Tensioning System

The Flexco® EZ-Air Kit allows users to maintain constant cleaner tension against the belt without access to on-site air or portable air tanks. The simple design enhances worker safety by eliminating the need to climb into or under the conveyor structure for manual adjustments with additional tooling. The EZ-Air can simply be adjusted with a handheld compressor from the safe side of the conveyor. This economical solution is suitable for operators of all skill levels, making it the ultimate companion to any Flexco® belt cleaning system.

## Features and Benefits

- **Works with Flexco® cleaners.** Compatible with all Flexco® belt cleaners that offer air bag side assemblies.
- **Easy installation and maintenance.** No existing skill set required.
- **No existing air supply needed.** Operated using a hand-held compressor.
- **Inexpensive option.** Advanced tensioning system offered at an economical price point.
