Belt Cleaner Information and Selection Guide

Why Are Belt Cleaners Needed?

- **Saves Money**
 - Increases belt wear life.
 - Extends life of rollers, pulleys and splices.
 - High cost of accidents.
- **Reduces Maintenance Costs**
 - Minimizes manual cleanup.
 - Protects against belt mistracking.
 - Reduces conveyor component replacement costs.
 - Reducing carryback from 3% to 1% means a 67% reduction in maintenance costs.
- **Keeps Conveyors Running Efficiently and Consistently**
 - Reduces unscheduled downtime.
 - Increases production uptime.
- **Improves Safety**
 - Reduces housekeeping problems.
 - 42% of conveyor-related accidents happen while maintenance tasks are being done.

Types of Belt Cleaners

- **Precleaners**
 - Mounted on the head pulley.
 - Mounted below the material flow.
 - Blade is always narrower than the belt width.
 - Ideally, the blade covers just the belt's material path.
 - Removes the big stuff. Typically cleans off up to 80% of the initial carryback.
- **Secondary Cleaners**
 - Located just past where the belt leaves the head pulley and anywhere down the beltline.
 - Special secondaries may allow for mounting under the head pulley.
 - Blade width is always the belt width or wider.
 - Removes sticky fines – the final cleaning job.
 - Cleaning efficiencies can be 90% +.
 - May require a hold-down roller for maximum performance.
- **Specialty Cleaners**
 - Precleaners or Secondaries designed especially for specific or extreme applications.

Definition of Terms

- **Carryback** – Material that sticks to the belt after it leaves the transfer point and continues falling off along the conveyor's return side.
- **Material Path** – The section of the belt where most of the material is conveyed. Typically the center 2/3 of the belt.
- **Hold-Down Roller** – A stabilizing roller or pressure roller located on top of the return side of the belt to prevent belt flap or to provide a consistent flat surface for the blades on a lighter-tensioned belt.

Types of Cleaner Blades

F-Tip/Blade - for mechanically fastened belts **V-Tip/Blade** - for vulcanized belts only **C-Tip/Blade** - for both

Polyurethane Blades

Not all polyurethanes are the same. Flexco's polyurethane blades are specially formulated for abrasion resistance and long wear. Independent testing has shown that Flexco's polyurethane blades last as much as 30% longer than other OEM blades.

- Easy on the belt.
- Work well with mechanical splices.
- Economical.
- Specialty formulations for high heat, chemical resistance, or water removal.

Less advanced polyurethane formulations result in blades that experience quicker wear and provide less efficient cleaning.

Tungsten Carbide

Excellent for superior cleaning efficiency and long wear. The quality and application of carbides can vary. Flexco has invested years of research and testing to develop tungsten carbide tips for both vulcanized and mechanically fastened belts. And a quality process ensures consistent results.

- Superior cleaning.
- Long wear.
- C-Tips/blades for mechanical splices and V-Tips/blades for vulcanized belts.

The “Material Path” Option (for Precleaners)

For optimal cleaning and reduced blade retensioning, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically the center 2/3 of the belt width. Choosing a blade only slightly wider than the material path can decrease differential blade wear which reduces blade retensioning maintenance, as well as reducing the frequency of blade replacement.

Blade Angle (Secondary Cleaners)

- 1. Aggressive** – excellent cleanability, high risk for belt damage.
- 2. 90° to belt** – good cleaning efficiency; must have good blade relief for splices.
- 3. Wiping** – a little less cleaning power; safer on belts in poor condition or with poor mechanical splices.

Belt Cleaning Systems

Many applications will require more than one belt cleaner to do a satisfactory cleaning job. A typical system includes a precleaner (to knock off the initial flow of carryback), one or more secondary cleaners (to take off the sticky fines) and many times, a final specialty cleaner (to remove the water).

Keys to Good Belt Cleaning

- **Proper cleaner selection for the application**
- **Correct installation**
- **Regular service maintenance**

Spec'ing and Ordering Belt Cleaners

Information needed:

- A. Belt width
- B. Conveyor frame (structure) width
- C. Head pulley diameter
- D. For precleaners – what is the belt's material path
- E. Material conveyed (dry, wet, sticky, etc.)
- F. Type of belt splice:
 - Mechanical – skived or unskived
 - Vulcanized
- G. Temperature or other extreme environmental factors
- H. Does the belt reverse

Precleaner Selection Guide

Product Notes:

- For optimal cleaning and reduced blade retensioning maintenance, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically 2/3 of the belt width. In most cases a blade size of belt width minus 8" (200 mm) may be the best selection.
- Each cleaner can be retrofitted with three replacement blade sizes (belt width minus 2" (50 mm), 8" (200 mm), or 14" (350 mm)).
- Comes complete with universal mounting plates and tensioner.
- Visual tension check. No guesswork on blade tensioning. Simply measure the spring, check label on tensioner and turn adjusting nut to restore optimal tension.
- Works with mechanical splices. Polyurethane blade glides over splices.
- Compatible with reversing belts.
- For replacement parts see the EZP1 Parts List on page 19.
- For applications requiring longer pole lengths, go to the minus 8" (200 mm) chart and select the cleaner one belt width size larger. This will provide a pole 6" (150 mm) longer and a blade size of belt width minus 2" (50 mm).

Lead time: 1 working day

Product Notes:

- For optimal cleaning and reduced blade retensioning maintenance, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically 2/3 of the belt width. In most cases a blade size of belt width minus 8" (200 mm) may be the best selection.
- Each cleaner can be retrofitted with three replacement blade sizes (belt width minus 2" (50 mm), 8" (200 mm), or 14" (350 mm)).
- Comes complete with universal mounting plates and tensioner.
- Visual tension check. No guesswork on blade tensioning. Simply measure the spring, check label on tensioner and turn adjusting nut to restore optimal tension.
- Works with mechanical splices. Polyurethane blade glides over splices.
- Compatible with reversing belts.

Product Notes:

- Take blade width and ordering number from the worn blade and use the Replacement Blade Chart.
- For optimal cleaning and reduced blade retensioning maintenance, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically 2/3 of the belt width. In most cases a blade size of belt width minus 8" (200 mm) may be the best selection.
- The ConShear™ blade has a faceted profile that renews the cleaning edge as it wears.
- Visual tension check. No guesswork on blade tensioning. Simply measure the spring, check label on tensioner and turn adjusting nut to restore optimal tension.
- ConShear™ blades are made of a special long-wearing polyurethane.
- A molded-in blade wear line indicates when the blade is worn out and needs to be replaced.
- Blade replacement is quick. Pull one pin, remove the old blade and slide the new one in.

Product Notes:

- White food-grade ConShear™ Precleaner is chemical resistant and all ingredients used in polyurethane formulation comply with the relevant requirements of 21 CFR (FDA Code of Federal Regulations) for use in repeated bulk dry food applications.
- For optimal cleaning and reduced blade retensioning maintenance, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically 2/3 of the belt width. In most cases a blade size of belt width minus 8" (200 mm) may be the best selection.
- Each cleaner can be retrofitted with three replacement blade sizes (belt width minus 2" (50 mm), 8" (200 mm), or 14" (350 mm)).
- Comes complete with universal mounting plates and tensioner.
- Visual tension check. No guesswork on blade tensioning. Simply measure the spring, check label on tensioner and turn adjusting nut to restore optimal tension.
- Works with mechanical splices. Polyurethane blade glides over splices.
- Compatible with reversing belts.
- For replacement parts see the EZP1 SS Parts List on page 24.
- For applications requiring longer pole lengths, go to the minus 8" (200 mm) chart and select the cleaner one belt width size larger. This will provide a pole 6" (150 mm) longer and a blade size of belt width minus 2" (50 mm).

Product Notes:

- Take blade width and ordering number from the worn blade and use the Replacement Blade Chart.
- For optimal cleaning and reduced blade retensioning maintenance, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically 2/3 of the belt width. In most cases a blade size of belt width minus 8" (200 mm) may be the best selection.
- The ConShear™ blade has a faceted profile that renews the cleaning edge as it wears.
- Visual tension check. No guesswork on blade tensioning. Simply measure the spring, check label on tensioner and turn adjusting nut to restore optimal tension.
- ConShear™ blades are made of a special long-wearing polyurethane.
- A molded-in blade wear line indicates when the blade is worn out and needs to be replaced.
- Blade replacement is quick. Pull one pin, remove the old blade and slide the new one in.
- For replacement parts see the EZP1SS Parts List on page 24.

Specifications:

- Maximum Belt Speed 700 FPM (3.5 m/s)
- Temperature Rating -30 to 180°F (-35 to 82°C)
- Minimum Pulley Diameter..... 10" (250 mm)
- Blade Height..... 7-1/4" (185 mm)
- Usable Blade Wear Length..... 4" (100 mm)
- Blade Material Polyurethane (chemical resistant/food grade)
- Available for Belt Widths 12 to 60" (300 to 1500 mm)
- CEMA Cleaner Rating Class 2

Product Notes:

- For optimal cleaning and reduced blade retensioning maintenance, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically 2/3 of the belt width.
- Each cleaner can be retrofitted with three replacement blade sizes (belt width minus 2" (50 mm), 8" (200 mm), or 14" (350 mm).
- Comes complete with universal mounting plates and tensioner.
- Visual tension check. No guesswork on blade tensioning. Simply measure the spring, check label on tensioner and turn adjusting nut to restore optimal tension.
- Visual blade wear check. Tensioner has built-in gauge to monitor blade wear.
- Works with mechanical splices. Polyurethane blade glides over splices.
- Compatible with reversing belts.
- For replacement parts see the EZP-LS Parts List on 29.
- For applications requiring longer pole lengths, go to the minus 8" (200 mm) chart and select the cleaner one belt width size larger. This will provide a pole 6" (150 mm) longer and a blade size of belt width minus 2" (50 mm).

Product Notes:

- Take blade width and ordering number from the worn blade and use the Replacement Blade Chart.
- For optimal cleaning and reduced blade retensioning maintenance, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically 2/3 of the belt width.
- The ConShear™ blade has a faceted profile that renews the cleaning edge as it wears.
- Visual tension check. No guesswork on blade tensioning. Simply measure the spring, check label on tensioner and turn adjusting nut to restore optimal tension.
- ConShear blades are made of a special long-wearing polyurethane.
- A molded-in blade wear line indicates when the blade is worn out and needs to be replaced.
- Blade replacement is quick. Pull one pin, remove the old blade and slide the new one in.

Product Notes:

- White food-grade ConShear Precleaner is chemical resistant and all ingredients used in polyurethane formulation comply with the relevant requirements of 21 CFR (FDA Code of Federal Regulations) for use in repeated bulk dry food applications.
- For optimal cleaning and reduced blade retensioning maintenance, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically 2/3 of the belt width.
- Each cleaner can be retrofitted with three replacement blade sizes (belt width minus 2" (50 mm), 8" (200 mm), or 14" (350 mm)).
- Comes complete with universal mounting plates and tensioner(s).
- Visual tension check. No guesswork on blade tensioning. Simply measure the spring, check label on tensioner and turn adjusting nut to restore optimal tension.
- Visual blade wear check. Tensioner has built-in gauge to monitor blade wear.
- Works with mechanical splices. Polyurethane blade glides over splices.
- Compatible with reversing belts.
- For replacement parts see the EZP-LS SS Parts List on page 33.
- For applications requiring longer pole lengths, go to the minus 8" (200 mm) chart and select the cleaner one belt width size larger. This will provide a pole 6" (150 mm) longer and a blade size of belt width minus 2" (50 mm).

Optional Mounting Bar Kit *	MMBK	75830	19.5
Mounting Plate Kit * (2 plates)	MMPK	76537	140.0

*Hardware Included

Lead time: 1 working day

Product Notes:

- Recommended for standard-duty conveyor applications. For tougher belt applications see the MMP Medium-Duty Precleaner (41). For extreme, abusive applications see the MHP Heavy-Duty Precleaner (49) or the MHCP Heavy-Duty Cartridge Precleaner (56).
- Material Path Option: Fit the blade width to the belt's material path. The material path is typically the center 2/3 of the belt width. In most cases a blade size of belt width minus 8" (200mm) may be the best solution.
- Each cleaner pole is retrofittable for three blade sizes (belt width minus 2" (50 mm), 8" (200 mm), or 14" (350 mm)).
- Pole Length: Belt width plus 54" (1350 mm). For conveyors requiring longer pole lengths, go to the minus 8" (200 mm) chart and select the cleaner one belt width size larger. This will provide a pole 6" (150 mm) longer and a blade size of belt width minus 2" (50 mm). For longer requirements see Installation Accessories – Pole Extender Kit on page 129.
- Visual Tension Check: No guesswork on blade tensioning. Measure the spring and adjust to specified length per blade width to restore optimal tensioning.
- To make cleaner installation easier and quicker, see Optional Mounting Kits on page 129.
- For replacement parts see MSP Parts List on page 39.

Product Notes:

- A molded-in wear line indicates when the blade is worn out and needs to be replaced.
- Faceted blade profile: Renews its cleaning edge as the blade wears.
- ConShear™ blades are made of a special long-wearing polyurethane.
- Quick blade replacement: Pull one pin, remove the old blade and slide the new one in.

Optional Mounting Kits

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Optional Mounting Bar Kit *	MMBK	75830	19.5
Mounting Plate Kit * (2 plates)	MMPK	76537	140.0

*Hardware Included

Lead time: 1 working day

Product Notes:

- Recommended for medium-duty conveyor applications. For abusive applications see the MHCP Heavy-Duty Cartridge Precleaner on page 56.
- Material Path Option: Fit the blade width to the belt's material path. The material path is typically the center 2/3 of the belt width. In most cases a blade size of belt width minus 6" (150 mm) may be the best solution.
- Each cleaner pole is retrofittable for three blade sizes (belt width minus 6" (150 mm), 12" (300 mm), or 18" (450 mm)).
- Pole Length: Belt width plus 54" (1350 mm). For longer requirements see Installation Accessories – Pole Extender Kit on page 129.
- Visual Tension Check: No guesswork on blade tensioning. Measure the spring and adjust to specified length per blade width to restore optimal tensioning.
- To make cleaner installation easier and quicker, see Optional Mounting Kits on page 129.

Product Notes:

- Recommended for medium-duty conveyor applications. For abusive applications see MHCP Heavy-Duty Cartridge Precleaner (56).
- Material Path Option: Fit the blade width to the belt's material path. The material path is typically the center 2/3 of the belt width. In most cases a blade size of belt width minus 6" (150 mm) may be the best solution.
- Each cleaner pole is retrofittable for three blade sizes (belt width minus 6" (150 mm), 12" (300 mm), or 18" (450 mm)).
- Pole Length: Belt width plus 54" (1350 mm). For longer requirements see Installation Accessories – Pole Extender Kit on page 129.
- Pneumatic Air Tensioner used for constant, automatic tension throughout the life of the blades. Can be used with site-available air lines or with the add-on Control Box or Control Box/Tank Combo Kit.
- To make cleaner installation easier and quicker, see Optional Mounting Kits on page 129.

Product Ordering Information

Line Connections for Pneumatic Air Tensioner

Control Box/Tank Combo Units for Closed System

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Control Box/Tank Combo Unit for Precleaner - 60 PSI	PAT-C-60	108230	64.0
Control Box/Tank Combo Unit for Secondary Cleaner - 100 PSI	PAT-C-100	108231	64.0

Product Notes:

- For use with cleaners with new PAT systems.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- ASME construction tank.
- Fully sealed enclosure includes all critical items - regulator, tank gauge, downstream gauge, schrader valve, in-line filter, downstream valve.

Control Box for Legacy Tank

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Control Box Kit for Precleaner - 60 PSI	PACB2-60	108228	13.6
Control Box Kit for Secondary Cleaner - 100 PSI	PACB2-100	108229	13.6

Product Notes:

- For use with Legacy PAT1/PAT2 tank systems ordered prior to January 2024.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- May also be paired with Air Tank for Legacy Control Box if preferred.

Air Tank for Legacy Control Box

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
ASME Air Tank Kit	PAT-N	108232	47.3

Product Notes:

- For use with Legacy PACB60/PACB100 control boxes ordered prior to January 2024.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- ASME construction tank.
- May also be paired with Control Box for Legacy Tank if preferred.

Lead time: 1 working day; shaded items: 3 weeks

Product Notes:

- A molded-in wear line indicates when the blade is worn out and needs to be replaced.
- Faceted blade profile: Renews its cleaning edge as the blade wears.
- TuffShear™ blades are made of a special long-wearing polyurethane.
- Quick blade replacement: Pull one pin, remove the old blade and slide the new one in.

Specifications:

- Maximum Belt Speed 1000 FPM (5 m/s)
- Temperature Rating TuffShear™: -30 to 180°F (-35 to 82°C)
TuffShear™ High-Temp: up to 275°F (135°C) with spikes to 325°F (164°C)
- Minimum Pulley Diameter..... 16" (400 mm)
- Blade Height..... 10" (250 mm)
- Usable Blade Wear Length..... 6" (150 mm)
- Blade Material Polyurethane (proprietary blend for abrasion resistance and long wear)
- Available for Belt Widths 24 to 96" (600 to 2400 mm) Other sizes available upon request.
- CEMA Cleaner Rating Class 4

Product Notes:

- Recommended for heavy-duty conveyor applications.
- Material Path Option: Fit the blade width to the belt's material path. The material path is typically the center 2/3 of the belt width. In most cases a blade size of belt width minus 6" (150 mm) may be the best solution.
- Each cleaner pole is retrofittable for four blade sizes (belt width minus 6" (150 mm), 12" (300 mm), 18" (450 mm), or 24" (600 mm)).
- Pole Length: Belt width plus 54" (1350 mm). For longer requirements see Installation Accessories - Pole Extender Kit on page 129.
- Visual Tension Check: No guesswork on blade tensioning. Measure the spring and adjust to specified length per blade width to restore optimal tensioning.
- To make cleaner installation easier and quicker, see Optional Mounting Kits on page 129.

Lead time: 1 working day

Shaded items are made to order.
Lead time: 3 weeks

Product Notes:

- Recommended for heavy-duty conveyor applications.
- Material Path Option: Fit the blade width to the belt's material path. The material path is typically the center 2/3 of the belt width. In most cases a blade size of belt width minus 6" (150 mm) may be the best solution.
- Each cleaner pole is retrofittable for four blade sizes (belt width minus 6" (150 mm), 12" (300 mm), 18" (450 mm), or 24" (600 mm)).
- Pole Length: Belt width plus 54" (1350 mm). For longer requirements see Installation Accessories – Pole Extender Kit on page 129.
- Check tension from regulator in control box. Adjust according to air tensioning per blade width for optimal tensioning.
- To make cleaner installation easier and quicker, see Optional Mounting Kits on page 129.

Product Ordering Information

Line Connections for Pneumatic Air Tensioner

Control Box/Tank Combo Units for Closed System

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Control Box/Tank Combo Unit for Precleaner - 60 PSI	PAT-C-60	108230	64.0
Control Box/Tank Combo Unit for Secondary Cleaner - 100 PSI	PAT-C-100	108231	64.0

Product Notes:

- For use with cleaners with new PAT systems.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- ASME construction tank.
- Fully sealed enclosure includes all critical items - regulator, tank gauge, downstream gauge, schrader valve, in-line filter, downstream valve.

Control Box for Legacy Tank

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Control Box Kit for Precleaner - 60 PSI	PACB2-60	108228	13.6
Control Box Kit for Secondary Cleaner - 100 PSI	PACB2-100	108229	13.6

Product Notes:

- For use with Legacy PAT1/PAT2 tank systems ordered prior to January 2024.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- May also be paired with Air Tank for Legacy Control Box if preferred.

Air Tank for Legacy Control Box

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
ASME Air Tank Kit	PAT-N	108232	47.3

Product Notes:

- For use with Legacy PACB60/PACB100 control boxes ordered prior to January 2024.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- ASME construction tank.
- May also be paired with Control Box for Legacy Tank if preferred.

Tank and Control Box sold separately.
See next page for options.

Optional Mounting Kits

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Optional Mounting Bar Kit*	MMBK	75830	19.5
Mounting Plate Kit* (2 plates)	MMPK	76537	140.0

*Hardware Included

Lead time: 1 working day

Product Notes:

- Heavy-duty design with massive SuperShear™ blades for constant cleaning power on abusive beltlines.
- Blade width equals belt width minus 6" (150 mm). Can be adjusted to belt's material path.
- Pole Length: Belt width plus 58" (1450 mm). For longer requirements see Installation Accessories - Pole Extender Kit on page 129.
- Tensioner Options: 1) PST Spring Tensioner for self-adjusting tensioning with easy retensioning adjustments; 2) Pneumatic Air Tensioner used for constant, automatic tension throughout the life of the blades. Can be used with site available air lines or with the add-on air tank.
- To make cleaner installation easier and quicker, see Optional Mounting Kits on page 129.

Product Ordering Information

Line Connections for Pneumatic Air Tensioner

Control Box/Tank Combo Units for Closed System

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Control Box/Tank Combo Unit for Precleaner - 60 PSI	PAT-C-60	108230	64.0
Control Box/Tank Combo Unit for Secondary Cleaner - 100 PSI	PAT-C-100	108231	64.0

Product Notes:

- For use with cleaners with new PAT systems.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- ASME construction tank.
- Fully sealed enclosure includes all critical items - regulator, tank gauge, downstream gauge, schrader valve, in-line filter, downstream valve.

Control Box for Legacy Tank

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Control Box Kit for Precleaner - 60 PSI	PACB2-60	108228	13.6
Control Box Kit for Secondary Cleaner - 100 PSI	PACB2-100	108229	13.6

Product Notes:

- For use with Legacy PAT1/PAT2 tank systems ordered prior to January 2024.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- May also be paired with Air Tank for Legacy Control Box if preferred.

Air Tank for Legacy Control Box

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
ASME Air Tank Kit	PAT-N	108232	47.3

Product Notes:

- For use with Legacy PACB60/PACB100 control boxes ordered prior to January 2024.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- ASME construction tank.
- May also be paired with Control Box for Legacy Tank if preferred.

Specifications:

- Maximum Belt Speed 1200 FPM (6 m/s)
- Temperature Rating -30 to 180°F (-35 to 82°C)
- Minimum Pulley Diameter..... 20" (500 mm)
- Blade Height..... 14" (350 mm)
- Usable Blade Wear Length..... 8" (200 mm)
- Blade Material Polyurethane (proprietary blend for abrasion resistance and long wear)
- Available for Belt Widths 24 to 96" (600 to 2400 mm) Other sizes available upon request.
- CEMA Cleaner Rating Class 5

Replacement UltraShear™ Blades

BLADE WIDTH		ORDERING NUMBER	ITEM CODE	WT. LBS.
in.	mm			
6	150	USB6	90410	20.0
12	300	USB12	90409	40.0

Lead time: 1 working day

Product Notes:

- Heavy-duty design with massive UltraShear™ blades for constant cleaning power on abusive beltlines.
- Blade width options for belt width minus 6" (150 mm) or 12" (300 mm). Can be adjusted to belt's material path.
- Pole Length: Belt width plus 79" (2000 mm).
- Tensioner: XDST Spring Tensioner
- To make cleaner installation easier and quicker, see Optional Mounting Kits on page 129.

Specifications:

- Maximum Belt Speed 1000 FPM (5 m/s)
- Temperature Rating -30 to 180°F (-35 to 82°C)
- Usable Blade Wear Length 3/8" (9 mm)
- Blade Material Long Life Tungsten Carbide (for vulcanized belts only)
- Available for Belt Widths 18 to 72" (450 to 1800 mm) Other sizes available upon request.
- CEMA Cleaner Rating Class 4

Product Ordering Information

H-Type® Segmented Blade Precleaner with Protected V-Tips

With Protected V-Tips*

For abusive applications where materials being cleaned off the belt wear the back sides of the cleaner's V-Tips.

No. C-Tips Required	3	4	5	6	7	8	9	10	12

Product Notes:

- Blade width equals belt width.
- Can be installed in any location from where the belt leaves the pulley on down the beltline.
- FormFlex™ cushions automatically adjust the individual tension of each blade to the belt.
- Works with mechanical splices.
- A special cushion pad helps absorb the impact from mechanical splices and eliminates blade vibration.
- Comes complete with universal mounting brackets.
- Versatile tensioner can be installed to either push-up or pull-up the cleaner to the belt, depending on installation space constraints.
- If belt is cupped or has low tension, a hold-down roller may be required to flatten and support the belt for optimal cleaning results.

YST Standard Duty
Drop Brackets

Product Notes:

- Works on reversing belts, vulcanized belts, and belts with mechanical fasteners.
- Pole Length: Belt width plus 30" (750 mm). For longer requirements, see Installation Accessories – Pole Extender Kit on page 137.
- Visual Blade Tension Check: Measure the tension spring and refer to Spring Length Chart on mounting base for the correct length for best cleaning performance.
- Tensioner: Standard Duty YST Spring Tensioner for self-adjusting tensioning with easy retensioning adjustments. The tensioner can be mounted in pull-up or push-up position.
- To make cleaner installation easier and quicker, see Optional Mounting Kits on replacement parts page or page 137.
- Simple design makes changing the blades fast and easy. Blades can be removed and replaced individually, or all at once by replacing the cartridge.

YST HD Drop Brackets

Product Notes:

- Works on reversing belts, vulcanized belts, and belts with mechanical fasteners.
- Pole Length: Belt width plus 54" (1350 mm). For longer requirements, see Installation Accessories – Pole Extender Kit page 137.
- Visual Blade Tension Check: Measure tension spring and refer to Spring Length Chart on mounting base for correct length for best cleaning performance.
- Tensioner: Standard Duty YST Spring Tensioner for self-adjusting tensioning with easy retensioning adjustments. The tensioner can be mounted in pull-up or push-up position.
- To make cleaner installation easier and quicker, see Optional Mounting Kits on replacement parts page.
- Simple design makes changing the blades fast and easy. Blades can be removed and replaced individually, or all at once by replacing the cartridge.

No. C-Tips or V-Tips Required	3	4	5	6	7	8	9	10	12

Product Notes:

- Recommended for medium-duty conveyor applications.
- Pole Length: Belt width plus 54" (1350 mm). For longer requirements, see Minline Installation Accessories – Pole Extender Kit on page 129.
- Cushion is designed to maintain continuous blade-to-belt contact and quick relief from passing mechanical splices.
- C-Tips are for mechanically fastened or vulcanized belts. V-Tips are for vulcanized belts only.
- Visual Blade Tension Check: Measure the tension spring and refer to Spring Length Chart for the correct length for best cleaning performance.

Product Notes:

- Patented Enhanced Service Advantage Cartridge™ allows for easy removal in even the dirtiest conditions.
- Heavy-duty design to deliver maximum cleaning efficiency on the most demanding, abusive beltlines.
- Pole Length: Belt width plus 54" (1350 mm) (single cartridge cleaners); Belt width plus 60" (1500 mm) (dual cartridge cleaners).
- Patented PowerFlex™ cushion design to maintain continuous blade-to-belt contact and quick relief from passing mechanical splices.
- C-Tips are for mechanically fastened or vulcanized belts. V-Tips are for vulcanized belts only.
- Visual Blade Tension Check: Measure the tension spring and refer to Spring Length Chart on mounting base for the correct length for best cleaning performance.
- Tensioner mounting brackets included for fast and easy installation.
- Cartridge Removal Kit included for easy removal of the cartridge.

Specifications:

- Maximum Belt Speed 1200 FPM (6 m/s)
- Temperature Rating -30 to 180°F (-35 to 82°C)
- Usable Blade Wear Length 3/8" (9 mm)
- Blade Materials C-Tip: Impact Resistant Tungsten Carbide (works with mechanical fasteners)
V-Tip: Long Life Tungsten Carbide (for vulcanized belts only)
- Available for Belt Widths 24 to 120" (600 to 3000 mm) Other sizes available upon request.
- CEMA Cleaner Rating Class 5

96	2400	CDWB96	79062	46.3

Actual blade width is belt width + 4" (100 mm).

ConShear DW Blades are black for easy identification.

Lead time: 1 working day

Product Notes:

- The ConShear™ "DryWipe" (DW) Blade is excellent for removing water from the belt. Use as the final cleaner in a cleaning system.
- Actual blade width is belt width plus 4" (100 mm). The extra length ensures the water is removed from the belt.
- Pole Length: Belt width plus 60" (1500 mm) for cleaners up to 60" (1500 mm), belt width plus 54" (1350 mm) for cleaners over 60" (1500 mm). For longer requirements, see Accessories – Pole Extender Kit on page 129.
- Visual Blade Tension Check: Measure the tension spring and refer to the Spring Length Chart on mounting base for the correct length for best cleaning performance.
- To make cleaner installation easier and quicker, see Optional Mounting Kits on page 129.

Product Ordering Information

Line Connections for Pneumatic Air Tensioner

Control Box/Tank Combo Units for Closed System

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Control Box/Tank Combo Unit for Precleaner - 60 PSI	PAT-C-60	108230	64.0
Control Box/Tank Combo Unit for Secondary Cleaner - 100 PSI	PAT-C-100	108231	64.0

Product Notes:

- For use with cleaners with new PAT systems.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- ASME construction tank.
- Fully sealed enclosure includes all critical items - regulator, tank gauge, downstream gauge, schrader valve, in-line filter, downstream valve.

Control Box for Legacy Tank

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Control Box Kit for Precleaner - 60 PSI	PACB2-60	108228	13.6
Control Box Kit for Secondary Cleaner - 100 PSI	PACB2-100	108229	13.6

Product Notes:

- For use with Legacy PAT1/PAT2 tank systems ordered prior to January 2024.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- May also be paired with Air Tank for Legacy Control Box if preferred.

Air Tank for Legacy Control Box

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
ASME Air Tank Kit	PAT-N	108232	47.3

Product Notes:

- For use with Legacy PACB60/PACB100 control boxes ordered prior to January 2024.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- ASME construction tank.
- May also be paired with Control Box for Legacy Tank if preferred.

Motorized Brush Cleaner

Optional Mounting Brackets (Pair)

ORDERING NUMBER	ITEM CODE	WT. LBS.
MBCDBK	79536	28.9

Lead time: 1 working day

Product Notes:

- Spins opposite the belt direction for optimal cleaning.
- Uniquely patterned bristles aid in reducing material buildup and clogging.
- Adjustable tensioners allow easy brush-to-belt adjustment as the bristles wear.
- Works on mechanically spliced or vulcanized belts.

Specifications & Guidelines

Motorized Brush Cleaner

Specifications

Belt Speed	Up to 700 FPM (3.5 m/s)
Vertical and Horizontal Clearance	12" (305mm)
Temperature Range	-20 to 180°F (-30 to 82°C)
Maximum Chevron/Cleat Height	1/2" (13mm)
Bristle Length	3-1/4" (83mm)
Overall Diameter	12" (305mm)
Shaft Length	Belt Width plus 42" (1067mm)
Shaft Diameter	1-7/16" (36.5 mm)
Motor Voltage and HP Options	208-230/460VAC 3 Phase*
	1 HP (cleaners 18-42") (450-1050mm)

*Hardware Included

Lead time: 1 working day

Shaded items are made to order.
Lead time: 3 working days

Product Notes:

- Free-rotating. Works only when the belt is running.
- Self-cleaning. Finger length, spacing and the rotary action allows carryback to fall free instead of clogging.
- Easy to install. Few parts and step-by-step instructions make the job simple.
- Long-wearing SBR rubber. Drum life ranges from 1 to 3 years depending upon the application conditions and the material being conveyed.
- Works on reversing belts.
- Finger rings can be replaced individually or all at once by replacing the drum.

Specifications

Belt Speed	Up to 500 fpm (2.5M/s)
Vertical and Horizontal Clearance	10" (250mm)
Temperature Range	-30 to 180°F (-35 to 82°C)
Maximum Chevron or Cleat Height	1" (25mm)
Finger Length	2" (50mm)
Rubber Durometer	45A
Overall Diameter	9-1/2" (238mm)
Shaft Length	Belt Width plus 30" (750mm)
Shaft	1" (25mm) Hex
CEMA Cleaner Rating	Class 3

Lead time: 1 day; shaded items 3 weeks

Product Notes:

- Heavy-duty design to deliver maximum cleaning efficiency on the most demanding, abusive beltlines.
- Pole Length: Belt width plus 54" (1350 mm). For longer requirements, see Mineline Installation Accessories – Pole Extender Kit on page 129.
- To make cleaner installation easier and quicker, see Optional Mounting Kits on page 129.
- It is recommended that mechanical fasteners on the belt be skived.

Product Ordering Information

Line Connections for Pneumatic Air Tensioner

Control Box/Tank Combo Units for Closed System

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Control Box/Tank Combo Unit for Precleaner - 60 PSI	PAT-C-60	108230	64.0
Control Box/Tank Combo Unit for Secondary Cleaner - 100 PSI	PAT-C-100	108231	64.0

Product Notes:

- For use with cleaners with new PAT systems.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- ASME construction tank.
- Fully sealed enclosure includes all critical items - regulator, tank gauge, downstream gauge, schrader valve, in-line filter, downstream valve.

Control Box for Legacy Tank

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Control Box Kit for Precleaner - 60 PSI	PACB2-60	108228	13.6
Control Box Kit for Secondary Cleaner - 100 PSI	PACB2-100	108229	13.6

Product Notes:

- For use with Legacy PAT1/PAT2 tank systems ordered prior to January 2024.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- May also be paired with Air Tank for Legacy Control Box if preferred.

Air Tank for Legacy Control Box

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
ASME Air Tank Kit	PAT-N	108232	47.3

Product Notes:

- For use with Legacy PACB60/PACB100 control boxes ordered prior to January 2024.
- 150# pop-off valve for safe pressurizing/charging of Air Tank.
- ASME construction tank.
- May also be paired with Control Box for Legacy Tank if preferred.

Shaded items are made to order.
Lead time: 10 working days

Product Notes:

- For optimal cleaning and reduced blade retensioning maintenance, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically 2/3 of the belt width. In most cases a blade size of belt width minus 12" (300 mm) may be the best selection.
- Each cleaner can be retrofitted with multiple standard replacement blade sizes belt width minus 6" (150 mm), 12" (300 mm), and 18" (450 mm), and provides additional options for custom-fit material paths.
- Blades can be worn until 1/4" (6 mm) above the blade holder, then rotated 180° for a second blade wear area.
- Works with mechanical or vulcanized splices.
- Pole end adjustment allows the blade to be set at a perfect attack angle for the application.
- Replacement blades with this design are simple and easy – no longer do you need to purchase an entire blade/pole assembly to replace the blade.

Optional Mounting Kits

Installation Accessories

OPTIONAL MOUNTING KITS FOR BELT CLEANERS

Versatile, adjustable brackets and plates that can be mounted on the conveyor structure so precleaners and secondary cleaners can be easily and quickly bolted into place.

75830

- Optional Mounting Bar Kit
(with bolts, nuts and washers)
- For mounting precleaners on open head pulleys.
 - Weld on both sides of pulley and bolt on steel plates.
 - For use with MSP, MMP, MHP, MHCP

76537

- Mounting Plate Kit (incl. 2 plates, 16" x 32"
(400 mm x 800 mm))
- For use with Mounting Bars to mount cleaners on open head pulleys.
 - For use with MSP, MMP, MHP, MHCP

76071

- Standard Mounting Bracket Kit
- For MHS/MDWS secondary cleaner installs.

76072

- Long Mounting Bracket Kit
- For installations that require extra length legs.

76073

- Optional Top Angle Kit
- Used with both standard and long mounting bracket kits for additional mounting options.

79536

- Brush Cleaner Drop Bracket Kit
- For brush cleaner installations that require extra length legs.

113390 & 79850

- Y-Type SD & HD Drop Bracket Kits
- For Y-Type cleaner installations that require extra length legs.

Optional Mounting Kits (incl. 2 brackets/bars)

24 x 24	600 x 600	28-5/16 x 27-3/4	720 x 705	3-7/16	90

Screen (Optional)

Screen serves as a guard that helps keep hands and tools from being placed into the chute/enclosure, but still allows visual access. Screen is hinged on the same side as the door and bolted in place on the other side so it does not require full removal for accessing the chute/enclosure. A wrench is required to remove the bolt that holds the screen in place as a safety feature. (Holes are sized per ANSI B11 and ISO 1819.)

Specifications:

- Temperature Rating-70 to 350°F (-55 to 175°C)

Grease Hose Extension Kit (incl. (2) ea. 16" hose w/fittings and tie-downs)	HDRGEK	79236	1.0

Lead time: 1 working day

Specifications:

- Overall Roll Length Belt Width +6" (150 mm)
- Overall Shaft Length Belt Width +30" (750 mm)
- Shaft Diameter 24–42" (600–1050 mm) – 1-15/16" diameter
48–60" (1200–1500 mm) – 2-7/16" diameter
72–84" (1800–2100 mm) – 2-15/16" diameter
- Shaft Construction 24–60" (600–1500 mm) – 1045 CD
72–84" (1800–2100 mm) turned from solid 4140 round stock

Product Notes:

- For use in applications with belt cup or belt flap.
- By preventing these issues secondary cleaner performance and blade/tip life is enhanced.

Part Number Cross-Reference Guide

ConShear™ Replacement Blades for OEM Belt Cleaners

ConShear™ Blade Technology

The patented polyurethane blade design that delivers a conforming and shearing action to provide consistent belt cleaning.

- **Faceted Profile** – the blade forms a new cleaning edge each time the blade wears down to a new faceted section.
- **Long Wearing** – a proprietary polyurethane blend that provides up to 30% more wear life than conventional solid blades.
- **Material Path Option** – choose the blade size that spans just the material path on the belt. This minimizes differential wear between the ends and the center of the blade. It allows the blade to conform better to the belt for more cleaning power. See next page for more information.
- **Replacement Indicator** – a molded-in wear line provides easy visual notice when the blade is worn out and needs to be replaced.
- **Quick, Easy Change-Out** – simply pull one pin, remove the worn blade, insert the new blade and replace the pin.

For best cleaning and wear life results the ConShear™ blade must be located against the conveyor head pulley in the correct position and must be tensioned properly.

See next page for proper blade installation and tensioning instructions.

Installation and Tensioning Tips

ConShear™ Replacement Blades for OEM Belt Cleaners

For optimal cleaning efficiency and long wear life, the ConShear™ blade must be located and tensioned correctly on the belt head pulley. If the OEM cleaner pole is in the wrong location the performance of the new blade may be adversely affected. See "Possible Problems" below. For tensioning, please follow these instructions. Our recommended tensioning may be as much as 2 times more than the OEM recommendation, but the added tension is needed to take full advantage of the ConShear™ Blade Technology.

Correct Location:

When blade contact is made against the head pulley (prior to tensioning) there should be a 1/16" (1.5 mm) to 1/8" (3 mm) gap at the bottom of the blade face (Fig. 1).

Possible Problems:

- **Pole location too far out** – The initial blade/belt contact gap will be larger than 1/8" (3 mm) (Fig. 2). If the blade is correctly tensioned it may flip through before it is fully worn. If tensioned too lightly, it will develop the "smile effect" quickly and not clean properly.
- **Pole location too far in** – If there is no gap at the initial blade/belt contact (Fig. 3), the tip of the blade may not be touching the belt. In this case, the blade will push away and lose its shearing (cleaning) effect. The blade may also develop a flap at the tip which may trap material.

Correct Tensioning:

The blade should be tensioned until the gap is gone (Fig. 4).

The "Material Path" Option

For optimal cleaning and reduced blade retensioning, the cleaner blade width should be sized to fit the material path of the belt. The material path is typically the center 2/3 of the belt width. Choosing a blade only slightly wider than the material path can decrease differential blade wear which reduces blade retensioning maintenance, as well as reducing the frequency of blade replacement.

Match blade width to belt's material path

Belt Width Minus 2" (50 mm)

Belt Width Minus 8" (200 mm)

Belt Width Minus 14" (350 mm)

Typically provides 3 to 5 times longer wear life. PU blades are blue in color.

**Kit includes blades and replacement blade bolts.

Lead time: 1 working day

Shaded items are made to order.
Lead time: 10 working days

Product Notes:

- Exclusive blade design – 20° slant on leading edge spirals debris off the belt.
- Self-adjusting blade – the blade floats on the belt and self-adjusts as it wears.
- Unique blade adjuster – turnbuckle-type adjuster allows the blade to be accurately positioned to the belt.
- Easy to install – comes fully assembled and can be placed right into position on the conveyor.

Product Notes:

- A belt cleaner for the tail pulley. Prevents damage to the belt, pulley, lagging, and belt splice.
- Keeps fugitive materials off the inside of the belt and out of the tail pulley.
- Installed at a 45° angle across the belt to discharge material to one predetermined side.
- The blade is installed in a fixed position, eliminating any bouncing problems.
- Exclusive 20° angled blade quickly spirals material off the belt.

REF	DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
1	Bar Replacement	BSB-BR	112960	1.7
2	Bar Replacement Kit	BSB-BRK	112956	2.0

Specifications:

- Maximum Belt Speed1000 FPM (5 m/s)
- Temperature Rating-20 to 180°F (-28 to 82°C)
- Horizontal Clearance Required.....16 to 30" (406 to 750 mm)
- Available for Belt Widths18 to 96" (450 to 2400 mm)

Product Notes:

- Intended to be located near load zone, skirting and idlers. Not intended for impact area.

Specifications & Guidelines

Flexco Slider/Impact Beds

Easy Solution for Load Zone Problems

- Complete load zone offering with slider beds through impact beds for up to 750 ft-lbs of force.
- No specifying trough angle; each bed is adjustable for 20°, 35° and 45° trough settings (ships at 35° setting).
- Low-profile installation. Because EZ Series beds feature trough wings that are adjustable, they lay flat during installation, providing more clearance.
- Full UHMW slider bars included on outside bar to provide proper sealing and long life.
- Unique Impact Bar Supports protect the impact bars from damage, extending service life. An Anti-Migratory Tab on each support secures the bar and prevents it from sliding in the direction of belt travel.
- All beds are manufactured for mounting holes belt width +9" (225 mm), per CEMA. For wider structure, contact Customer Service for special quote.

How to spec the correct slider/impact bed for your conveyor transfer point

For non-impact areas.

Lead time: 1 working day

Product Notes:

- CEMA D construction
- No need to specify troughing angle – designed to adjust to 20°, 35°, 45°.
- Designed for containment in the load zone, but not intended for impact zones.
- Slider bars are solid 1" (25 mm) UHMW providing longer wear life and consistent load zone sealing.
- Product ships with two rollers. Additional rollers can be added by purchasing an EZRMK and the appropriate corresponding roller.

Product Notes:

- CEMA D construction
- No need to specify troughing angle—designed to adjust to 20°, 35°, 45°.
- Outermost trough bar features 1" (25 mm) solid UHMW slider bar to provide longer wear life and consistent load zone sealing where impact is not present.

72	1800	EZAI-72I	79098	173.6

For placement in between 3 or more beds or in transitions;

Adjusts from 10–45° in 5° increments.

SHIM-KIT-EZAI 91857 - includes two 1/4" (6 mm) and two 1/2" (12.5 mm) shims.

Lead time: 1 working day

Product Notes:

- Modular design accommodates any length of load zone
- CEMA D construction
- No need to specify troughing angle – designed to adjust to 20°, 35°, 45°
- All bars feature 1" (25 mm) solid UHMW
- With removal of a few bolts, the wings and center sections slide out for service
- Optional add-on roller to join two beds and reduce the space between idlers from every 24" (600 mm) to every 12" (300 mm).

Specifications & Guidelines

It's the Structure, not the bars

It absorbs more impact to save your belt. Our exclusive Velocity Reduction Technology™ provides two levels of impact relief.

Level 1: Impact Bars first absorb impact energy. Unique Impact Bar Supports on all DRX™ Impact Beds allow the impact bars to function properly - expanding and absorbing more impact energy.

Level 2: On DRX™ 200, 750, and 1500 impact beds, Isolation Mounts provide a second level of reaction force reduction, absorbing additional impact energy and minimizing transmission back to the belt. The DRX™ 3000 and 4500 Dynamic have Impact Energy Absorbers to disperse an immense amount of impact, even in extremely severe applications.

User-Friendly Slide-Out Service™

- All DRX™ Impact Beds separate in the middle to slide apart and out.
- Can be easily and safely converted from the run position to the service position.
- Impact bars are easy to get to for changeout. A complete changeout can be done in one or two hours.

Unique Impact Bar Supports protect the impact bars from damage, extending service life. An Anti-Migratory Tab on each support secures the bar and prevents it from sliding in the direction of the belt.

Other Features and Benefits

- Uses exclusive anti-spin square washers. Allows use of carriage bolts to secure impact bars instead of expensive T bolts.

How to spec the correct impact bed for your conveyor transfer point

Impact Energy Calculation Chart

Impact Energy

Lump Weight (w) _____

Drop Height (h) x _____

Total = lb-ft _____ See Below

Up to 200 lb-ft (25 kg-m)—DRX200

200 to 750 lb-ft (25 to 100 kg-m)—DRX750

750 to 1500 lb-ft (100 to 200 kg-m)—DRX1500

1500 to 3000 lb-ft (200 to 400 kg-m)—DRX3000

1500 to 4500 lb-ft (200 to 600 kg-m)—DRX4500

DRX™ Impact Beds Optional Parts and Tools

Impact Bars with 1" UHMW

For impact beds that have heavy abrasive wear on the impact bars.

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
4' Impact Bar with 1" UHMW	IB4-1U	76965	17.0
5' Impact Bar with 1" UHMW	IB5-1U	76966	21.2

Lead time: 1 working day

Impact Bar Bolt Kit for Other OEM Impact Beds*

1/2" carriage bolt, square washer, flat washer and Nylock nut to mount DRX Impact Bars on other OEM beds that use 1/2" T-bolts.

Count cross stringers on OEM bed (example: 3 cross stringers require 3 Bolt Kits per impact bar)

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
OEM Impact Bar Bolt Kit	OIBBK	76950	0.5

*Kit includes (1) ea. bolt, square washer, flat washer, and Nylock nut.

Lead time: 1 working day

Optional Impact Bar Bolt Kit

Impact Bed Handy Wrench

A ratcheting wrench with 2 common socket sizes: 3/4 & 15/16" (19 & 24 mm) for installation and maintenance of impact beds.

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. LBS.
Impact Bed Handy Wrench	HW-IMPB	76939	1.6

Belt Tracking Products

MODEL	APPLICATION RANGE
Belt Positioner™	Return side only, 800 PIW max tension on Small, Medium, and Large; 1200 PIW max tension on Extra Large. Also works on reversing belts.
PTEZ™	Medium-duty belts up to 1600 PIW max tension. Also works on reversing belts. Belt width 18–48" (450–1200 mm).
PT Smart™	Medium-duty belts up to 1600 PIW max tension. Belt width 42–84" (1050–2100 mm). Belt thickness 1" (25 mm) maximum.
HD PTEZ™	Medium-duty belts up to 2400 PIW max tension. Belt widths + 9" (225 mm) idler. Belt thickness 1" (25 mm) maximum. Also works on reversing belts.
PT Max™	Heavy-duty belts up to 3000 PIW max. Generally 3/4–1" thick (19–25 mm). Belt width 24–60" (600–1500 mm).
HD PT Max™	Heavy-duty belts up to 6000 PIW max tension. Belt width 54–84" (1350–2100 mm).

Lead time: 1 working day

Use next larger size for belt widths between ranges.

NOTE: Idler Rollers on sizes S, M, and L are 5" (125 mm) diameter and rated CEMA D,

Idler Rollers on the XL size are 6" (150 mm) diameter and rated CEMA E.

Product Notes:

- The Positioner should be centered between two standard return rollers. For general applications – standard belts up to 72" (1800 mm): position the unit no closer than 3' (.9 m) to a return roller and no farther than 6' (1.8 m).
- Works on the return side of the conveyor using simple angled rollers mounted in a fixed position to quickly and continuously funnel the belt into the correct path.
- A "quick fix" solution for belts that consistently wander to one side.
- Typically installed before the tail pulley to keep the belt centered at the critical loading point. Center loading is the key to solving many top side tracking problems.
- Idler rollers make smooth contact with the return belt's bottom cover, eliminating excessive wear and damage to the belt's edges.
- Has no pivoting mechanism to freeze up and cause the unit to stop working.
- Once installed, no further adjustment is required.

Product Notes:

- Simple adjustable mounting brackets ensure quick and accurate installation.
- Urethane roller cover ensures long-lasting performance.
- Works in multiple applications, yet economical. Single-direction and reversing belts. Wet or dry conditions. Belts with edge damage or wear. Belts mistracking to one or both sides.
- Easy ordering and installation. Enhanced to meet instant demands for training solutions, the PTEZ™ is available on a one-working-day lead time. The simple brackets and component construction also ensure a quick and easy installation.
- Uses tapered and patterned roller to activate the trainer movement. Pivot influences direction while Tilt increases the tension on the mistracked side – the result is two forces quickly moving the belt back to center.
- Works with mechanically fastened or vulcanized belts.

*Hardware included

Lead time: 1 working day

Note: All replacement parts offered are common to all three PT Max models: Top Side, Return Side, and V-Return.

Shaded items are made to order.

Lead time: 15 working days

Product Ordering Information

Enclosed Skirting

Enclosed Skirting Base Unit

Base unit configuration options: belt width, length, no cover or cover, standard or tangential seal. One Leg Kit included with each Base Unit.

Product Notes:

- Maximum span between support legs is 96" (or 8') and they are to be attached to the conveyor stringer or truss
 - For each run of Enclosed Skirting one additional Leg Kit is required to complete the installation. See Leg Kits on the Replacement Parts page.
- Skirting solutions do not include required skirt rubber; purchase from local Flexco distribution
- Straight skirt wall and tangential skirt wall available for different skirt rubber sealing options
- Product is built and sold to CEMA standards
- Skirt board liners made with AR400 abrasive resistant plate steel

Price Per Inch for reference only; standard skirting is available in 25' (15.2 m) lengths.

Lead time: 1 working day

Product Notes:

- Urethane skirting offers a more wear-resistant material than typical rubber, often providing as much as 3–4 times the wear life in similar applications. The lower coefficient of friction reduces strain on the system.
- Works with Flexco series of skirt clamps that offer simple serviceability: RMC1/PAL-Pak, Flex-Lok, and Flex-Seal.
- Uses soft durometer (65A) urethane with exceptional tear resistance to ensure a good seal and long belt life.
- 25' (7.6 m) roll size ensures easy transportation, while the 35° chamfer eliminates the typical skirting break-in period.
- Suitable for most applications: single direction or reversing belts, wet or dry conditions, old or new belts, vulcanized or mechanically-spliced systems.
- Rated for temperatures from -20 to 180°F (-30 to 82°C).

Shaded items are made to order.
Lead time: 1-2 weeks

PAL PAK (Standard)

Bolt-On PAL PAK (Standard)

Product Notes:

- Solves material spillage problems in the conveyor loading zone.
- Stops material loss, eliminates safety hazards, and reduces wear on conveyor components.
- LS (Limited Space) model for restricted space areas and for portable equipment.
- Pick-A-Length (PAL) PAK option for special or longer length requirements.
- Bolt-on Clamp Pins eliminate welding on applications where sparking can be a safety hazard.
- Anti-Vibration (standard) Clamp Pin stays locked even in applications with severe vibration.

Clamp Pin	FL-CP-ISS	71164	1.9

Skirt board & rubber not included.

Skirt rubber thickness range: 5/16–1" (8–25 mm)

Lead time: 1 working day

SERVICE MAINTENANCE:

- **Inspection** – Periodically inspect the clearance between the skirt rubber and the belt. If this gap is more than 1/4" (6 mm) or if excessive fines are escaping, readjust the skirt rubber.
- **Adjustment** – Unlock the wedges on the clamp pins and slide the skirt rubber down to the belt. Relock the clamp pins.

TROUBLESHOOTING:

Problem: Skirt rubber slips out of skirt clamp.

Solution: 1. Check to insure wedges in clamp pins are locked.

2. Check skirt rubber position. Skirt rubber must not fold and lie on top of belt.

Standard

Mini

Shaded items are made to order.

Lead time: 1 working day

Shaded items are made to order.
Lead time: 8 -10 weeks

Specifications:

- Temperature Rating5 to 185°F (-15 to 85°C)
- Rubber Compound.....SBR (Styrene-Butadiene-Rubber)
- Rubber Hardness.....68 ± 3 Shore A
- Ceramic Compound
(Diamond Ceramic Lagging)Aluminum Oxide (Al₂O₃)
- Ceramic Hardness
(Diamond Ceramic Lagging)83 HRA Rockwell Hardness Scale A

Strips = Pulley Diameter (in) x 3.14 ÷ 8, then round up.

Rolls = $\frac{\text{Strips} \times (\text{Face Width} + 4")}{12}$

A or B

A = Light Duty = 132"; B = All Others = 252"

*For Flex-Lag® Light Duty Rubber all material is 8" (200 mm) wide and 10.8' (3.3 m) rolls.

**For Flex-Lag® Natural and Flame-Resistant Rubber, all material is 8" (200 mm) wide in 21' (6.5 m) rolls.

Ordering Number Key: **N** - SBR, **FR** - FRAS

Shaded items are made to order.
Lead time: 8 -10 weeks

CERAMIC STRIP CONFIGURATION

Specifications:

- Temperature Rating5 to 185°F (-15 to 85°C)
- Rubber Compound.....SBR (Styrene-Butadiene-Rubber)
- Rubber Hardness.....68 ± 3 Shore A
- Ceramic Compound.....Aluminum Oxide (Al₂O₃)
- Ceramic Hardness.....83 HRA Rockwell Hardness Scale A
- Ceramic Coverage.....39%, strips are 8" (200 mm) wide

Product Notes:

- No wasted ceramic with easy-to-specify dimensions by using pulley or belt width.
- Constructed from individual ceramic tiles molded into high-durometer rubber for superior abrasion resistance.
- Horizontal grooves trap and deflect water.
- Molded ceramic buttons grip the belt's underside for positive traction and no slippage.

Strips Required = Pulley Diameter (in) x 3.14 ÷ 8, then round up.

Flex-Lag® Toolbox

DESCRIPTION	ORDERING NUMBER	ITEM CODE	WT. (LBS)
With Power Tools	LAGGING-TB	79080	32.0
Without Power Tools	LAGGING-TB2	79099	20.0

Both Include:

- 25-ft measuring tape
- BCP location tool
- Chalk line
- Paint brushes (3)
- Lagging stitchers (3)
- White paint marker
- HD knife and replacement blades
- Bench brush
- Deadblow hammer

LAGGING-TB Also Includes:

- Air hammer kit
- 24-grit flap disc
- Metal grinding disc
- Rubber buffing disc
- Oscillating tool and accessories

Product Ordering Information

Flex-Lag® Rubber Lagging Weld-On™ Pulley Lagging

Strips Required = Pulley Diameter (in) ÷ 2, then round down.
