

# RSC187 INSTALLATION TOOL

## Streamline Belt Repairs with the RSC187 Installation Tool

Complex conveying operations do not have the luxury of shutting down on a schedule. When a belt fails in a remote agricultural field, a busy logistics hub, or a food packaging plant during peak season, you can't wait for compressed air hookups or electrical connections.

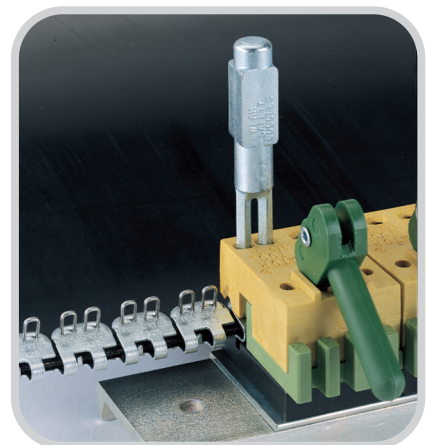

With the RSC187 Installation Tool and a hammer, operators can install RS62, RS125, and RS187 Alligator® Staple fasteners anywhere your belt needs them. No compressed air. No electricity. No excuses. Just accessible and quick installation.

Whether you're fixing conveyor systems in remote recycling facilities or keeping agricultural equipment running during harvest season, the RSC187 delivers professional-grade splices with ease. Don't let infrastructure limitations control your repair schedule; maintain your belt splices on your own terms.

### ***Features and Benefits:***

- Staple drivers set two or four staples simultaneously for fast, efficient splicing
- Designed for belts from 1.5mm to 6.4mm thickness across multiple industries
- Tool size widths available from 4-60" to meet production lacing and fabrication shop requirements
- Complete tool kit comes with staple final set plate, hand skiver, belt marker, belt nippers, and 1lb (.45 kg) hammer
