

NOW

**CUSTOM MADE V-BELTS IN
ANY LENGTH WITH ...**

ALLIGATOR[®] **BELT** FASTENERS

SIMPLE AS A, B, C,

**ONE
STRONG
JOINT**

- One strong joint permit fast and easy installation on all types of drives, particularly fixed center drives and drives with outboard bearings.
- Conveying with V-belts of either standard or "ruff" top design is now possible.
- V-belts can be made to any length. Center distances are no problem. Also, the high cost of special length belts can be avoided.
- Continual operation of machine is assured. When an endless belt breaks, merely cut off the required length of belt from a roll of Fastener-V-Belting, apply an Alligator V Fastener and the machine is ready to "roll" again.

THE BELTING . . .

NOTE: Alligator V-Belt Fasteners should be used on on Fastener-V-Belting which is of cross-woven fabric construction. They are not to be used for repairing or splicing conventional endless V-belt of multicord construction. Here is why: - because there are no cross-woven cords in an endless belt, its holding power for a V Fastener is inadequate and a fastener would eventually pull out. Fastener-V-Belting has the necessary strength to eliminate fastener pullout under normal operating conditions.

End of belt enlarged to show construction ie:

Manufactured of cross woven duck fabric maximum fastener grip-available in 100' and 250' rolls in the following types:

CONVENTIONAL "V" TYPE

Made in A, B, C and D cross sections.

DOUBLE "V" TYPE

Made only in "BB" cross sections.

"RUFF TOP"

Made in A, B, C and D cross sections.

. . . THE FASTENERS

- A312** - For "A" Belting (Packed 10 Sets per box)
- A312-S** - For "A" Belting (Packed 5 Sets per box)
- B437** - For "B" Belting (Packed 10 Sets per box)
- B437-S** - For "B" Belting (Packed 4 Sets per box)
- C531** - For "C" Belting (Packed 10 Sets per box)
- D750** - For "D" Belting (Packed 10 Sets per box)
- BB4** - For "BB" Double V Belting (Packed 10 Sets per box)

ALUMINUM END-PLATE FASTENERS FOR HIGH SPEED DRIVES I.E., 400-5500 FPM.

ALB437 For "B" Belting (Packed 10 Sets per Box)

ALC531 For "C" Belting (Packed 10 Sets per Box)

REFER TO PRICE SHEET FOR FASTENER SPARE PARTS LIST.

INSTALLATION TOOLS

HOLDER

REQUIRED

- A31255** - For "A" Fasteners (Included in every box of "A" Fasteners)
- B43755** - For "B" Fasteners
- C53155** - For "C" Fasteners
- BB455** - For "BB" Fasteners

D75060 - For "D" Fasteners
*For "D" Belting a heavy duty piercing tool (not picture) in supplied complete with Rocker Pin Tool.

ROCKER PIN TOOLS

REQUIRED

- For all Fasteners except D4M and A312.
- B43740** - For "B" & "BB" Fasteners
- C62540** - For C, and D Fasteners

TIGHTENER

OPTIONAL

Desirable for fixed Center Drives-used to pull belt ends together in grooves of sheaves.

- B43750** - For "B" Fastener
- C53150** - For "C" Fastener
- D75050** - For "D" Fastener

CUTTER

OPTIONAL

- C-62520** - For A, B, BB, C and D belting.

INTRODUCTORY KITS

(Inexpensive kits for the small user "A" and "B" belts)

"SA1"

CONTENTS

- 20' "A" Fastener-V-Belting
- 1-A31255 Holder
- 5-A312 Alligator V Belt Fasteners

"SA2"

CONTENTS

- 20' "B" Fastener-V-Belting
- 1-B43755 Holder
- 4-B437 Alligator V Belt Fasteners
- 1-B43740 RP Tool

"TOOL ASSORTMENTS"

For the convenience of the user, toll kits for B and C Belting are available.

No. B43711

Contents:

- 1-B43755 Holder
- 1-B43750 Tightener
- 1-B43740 RP Tool

No. C53111

Contents:

- 1-C53155 Holder
- 1-C53150 Tightener
- 1-C62540 RP Tool

HOW TO DETERMINE BELT LENGTH FOR AN EXISTING DRIVE INSTALLATION*

1

Identify belt cross section to be used by comparing cross section of belting being replaced with dimensions of A, B, C, and D belting shown below.

2

Determine outside circumference by wrapping a steel tape over the outside diameter of sheaves.

3

From measurement arrived at in Step 2.

a-Convert to pitch length (laid out flat length)

b-Allow for fastener opening

c-Allow for initial belt stretch

Refer to correction chart below for this information.

BELT LENGTH CORRECTION CHART

BELT SIZE	A	B	C	D
Correction deduction converting from outside circumference length to pitch length	$\frac{7}{8}"$	$1\frac{1}{4}"$	$1\frac{3}{4}"$	$2\frac{1}{2}"$
Fastener Openings	$\frac{3}{8}"$	$\frac{3}{4}"$	$1"$	$1"$
TOTAL OF ABOVE	$1\frac{1}{4}"$	$2"$	$2\frac{3}{4}"$	$2\frac{1}{2}"$
Initial Belt Stretch PER FOOT	$\frac{3}{32}"$	$\frac{3}{16}"$	$\frac{3}{16}"$	$\frac{1}{8}"$

EXAMPLE

If you have a "B" section drive with outside circumference of 140", deduct 2" for conversion to pitch length and for fastener opening. This leaves 138" from which you must deduct the allowance for initial stretch— $\frac{3}{16}"$ times $11\frac{1}{2}'$ (138")—or approximately $2\frac{1}{8}"$. You should cut your Fastener-V-Belting $135\frac{7}{8}"$ (138- $2\frac{1}{8}"$) when laid out flat and straight.

*When endless V-Belt size is known refer to Fastener-V-Belting replacement chart for correct cut lengths.
