

MHCP

Heavy-Duty Cartridge Precleaner

Massive, Rugged, Ready to Work

The MHCP Heavy-Duty Cartridge Precleaner features segmented SuperShear™ blades that are engineered to stand up to the most abusive beltline conditions, such as wet, sticky fire clay, and maintain constant cleaning force. The massive blades have an extended wear life and also a quick-change blade cartridge feature. This is an extreme-duty cleaner that gets the job done – and with minimal maintenance.

Features and Benefits

- **Works with mechanical fasteners.** The shock-absorbing tensioners allow mechanical splices, skived or unskived, to pass without damage to the splice or the cleaner and with minimal cleaning disruption.
- **Retrofits to other cleaners.** The MHCP blade cartridge will fit on the poles of other cleaner manufacturers. Now you can experience the benefits of the SuperShear™ blades without having to install a completely new cleaner.
- **Complete cleaning system.** When teamed with the MHS HD Secondary Cleaner, it makes up a system that delivers maximum cleaning power for the most abusive conveyor applications.
- **Made for mining conveyors.** Made from heavy-duty, corrosion-resistant steel, the MHCP is available in sizes for belt widths from 24 to 120" (600 to 3000 mm). Additional sizes are available upon request.

Heavy-Duty Cartridge Precleaner

Specifications and Guidelines

Maximum Belt Speed

1200 FPM (6 m/s)

Temperature Rating

-30° to 180°F (-35° to 82°C)

Minimum Pulley Diameter

20" (500 mm)

Blade Height

14" (350 mm)

CEMA Cleaner Rating

Class 5

Usable Blade Wear Length

8" (200 mm)

Available for Belt Widths

24 to 120" (600 to 3000 mm)

Blade Material

Polyurethane 90 durometer
(proprietary blend for abrasion
resistance and long wear)

Overall Pole Length

Cleaner size + 58" (1450 mm)

Maximum Conveyor Span

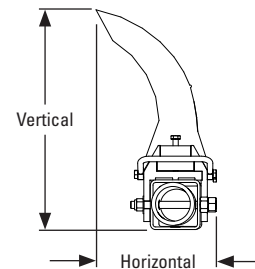

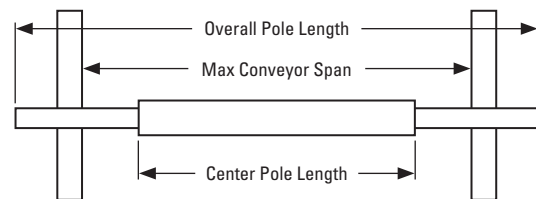

Cleaner size + 42" (1050 mm)

Horizontal Clearance Required

7" (175 mm)

Vertical Clearance Required

19" (475 mm)

*Includes blades, cartridge, and mounting bolts.

Lead time: 1 working day

NOTE: For easy blade changeout, remove cartridge with worn blades and replace with new blade cartridge kit. New blades can then be installed in the old cartridge for the next changeout.
