

PAT

Portable Air Tensioner

Constant Pressure for Premium Cleaning

The PAT System utilizes air or nitrogen to provide constant pressure for each cleaner. Whether the cleaner blades or tips are new or in use for several months, the PAT System ensures the proper tension will be applied to the cleaner throughout its life. With minimal maintenance, each cleaner will be effective from start to finish.

Features and Benefits

- **Works with Flexco mechanical fasteners.** The PAT Air Tensioner allows the blade/tips to quickly move away from the belt when a splice passes. The urethane on the Pre-cleaners and MDWS easily glides over the splice, while the MHS and its four points of relief move away from the splice without damage and with minimal cleaning disruption.
- **Made for mining conveyors.** Made from heavy-duty, corrosion-resistant materials, the PAT cleaner offering is available for belt widths from 24" to 84" (600 to 2100mm). Additional sizes are available upon request.
- **Cleaning efficiency powered by air or nitrogen.** System provides constant blade-to-belt pressure, ensuring the best cleaning capability.
- **Complete cleaning system.** Team up the MMP, MHP or MHCP with the MHS to create a system that delivers maximum cleaning. If extra water is present, the MDWS DryWipe can be added.

PAT Portable Air Tensioner

Ordering Information

Each cleaner comes with one PAT Control Box
