

The Economical, Efficient Belt Training Solution

The patented PT Smart™ Belt Trainer takes our unique "pivot and tilt" design and puts it into a more economical, medium-duty trainer. This unit reacts and compensates instantly to belt misalignment, ensuring that the belt stays away from the structure and the material stays on the belt. The result: a continuous solution to mistracking problems that cause damage to the belt and conveyor structure—at an affordable price.

Features and Benefits

- **Works in multiple applications.** Above-ground version features an idler belt-width+75 mm (3"), 50 mm (2") sensor rollers, and easy-to-install mounting brackets. Underground version comes with an idler belt-width+225 mm (9"), 75 mm (3") sensor rollers, and an extended mounting bracket for underground structures.
- **Easy ordering and installation.** Enhanced to meet instant demands for training solutions, the PT Smart is available on a one-working-day lead time. The simple brackets and component construction also ensures a quick and easy installation.
- **Economical.** PT Smart is a very versatile, budget-conscious, out-of-the-box solution.
- **Made to last.** Durable and strong, the PT Smart offers a 2-year "No Risk" Performance Guarantee.
- **Works with mechanically fastened or vulcanized belts.**
