

# Baler Belt Skiver

## Portable Tool Provides Quality Skives in Under 30 Seconds

Hand skiving baler belts takes time and precision. The Flexco Baler Belt Skiver is a safe and effective tool for quickly and easily skiving baler belts. Simply set the skive height, close the cover, and skive your belt in less than 30 seconds using a cordless drill. With the cover closed, the blade is completely enclosed during the skiving process eliminating the chance for injury while skiving.

Optional **bench mounting kit** for belt shop use

Driven with an **electric drill or ratchet**

Hold down shaft also acts as a **blade guard**

**Skive depth is adjustable** with use of shims – tool includes **convenient storage location** so shims are available when you need them.

Closed cover clamps belt tightly in place to allow for **uniform skive**

### **Features and Benefits:**

- **Lightweight** extruded aluminum body
- **Portable** – weighs less than 2 pounds
- **Skive** in less than 30 seconds
- **Can be used** on new or worn belts
- For belt widths **up to 7.5"**
- **Adjustable** skived belt thickness from 0.200" to 0.250"

## Baler Belt Skiver
