- Laser Belt Square

TRENDS IN THE PARCEL INDUSTRY

E-COMMERCE

Online purchases are driving increased shipments around the globe. With today's consumers spending over **\$370 billion online per year**, the demand for parcel handling is on the rise.

THROUGHPUT

The largest hubs process over **1.8 million packages per day** during peak season, and throughput is predicted to **increase by 13%** over the next few years. An efficient facility is necessary to keep up with these volumes.

FLEXCO AND THE PARCEL INDUSTRY

For over 100 years, Flexco has focused on customers to create belt conveyor solutions that meet ever-changing needs. We've developed an intimacy with the parcel industry and its key players, gaining industry expertise and earning a reputation as a trusted partner in productivity. Our products address factors that impact uptime, efficiency, and safety in order to support a profitable industry with a bright future.

GLOBAL SUPPORT WHEREVER YOU NEED IT, WHENEVER YOU NEED IT

Flexco Direct Support

Flexco has **13 locations** strategically located around the world. Our team of salespeople, engineers, and service personnel is dedicated to supporting your facility.

Global Distribution Network

With representation in over **150 countries**, Flexco has local inventory available near you. This makes it easy to get what you need, right when you need it. With both a team of field representatives and global distribution partners, Flexco is grounded in real people who are dedicated to the future of the parcel industry.

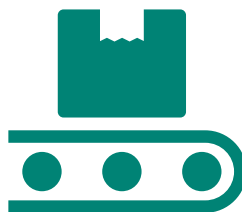

Flexco University

Train with the experts in belt conveyor productivity. Flexco University gives you access to training and technical support **24/7**. From classroom training and on-site sessions to our online training program, Flexco University provides you with many opportunities to learn important details about our products, including how to use them within your most demanding applications.

UPTIME

Uptime is critical within parcel handling operations. Daily deliveries fall behind when facilities operate at anything less than **97% uptime**, and downtime can cost as much as **\$2,500 per minute**.

BELT SPEEDS

To keep up with increased throughput, facilities have increased their belt speeds, with some belts moving at up to **180 meters per minute**.

180 meters PER MINUTE
